

Materials List and Part Numbers

Contains part numbers for: [Cut-Only Films](#)

Materials available in this series:

- 210 Dusted & Frosted Crystal
- GerberMask Ultra
- GerberMask II
- Heat Transfer Flock
- Metallized Polyester
- Sandblast material
- Screen and Stencil film

Gerber **210 Dusted and Frosted Crystal**

<u>Color</u>	<u>15" Punched</u>		<u>30" Punched</u>	
	10 yards	50 yards	10 yards	50 yards
Dusted Crystal 210-314	P32442A	P32443A	P32444A	P32445A
	10 yards	50 yards	10 yards	50 yards
Frosted Crystal 210-324	P35717A	P35718A	P35715A	P35716A

Dusted Crystal 3 mil film provides the appearance of etched glass. Perfect for all window, glass, mirror, and clear plastic applications. Three-year exterior life.

Frosted Crystal 3 mil film provides the appearance of sandblasted glass. Perfect for all window, glass, mirror, and clear plastic applications. Three-year exterior life.

Gerber **GerberMask ULTRA** – Masking Material – New Improved!

GerberMaskULTRA is a 4-mil white vinyl film, coated with a **low-tack** removable adhesive now on a **new moisture-resistant liner**. Designed to be used as stencil masking film for application to a variety of smooth, flat substrates. The low-tack adhesive allows easy removal from substrates, with no adhesive transfer. Suitable for use on glass, Plexiglas, polycarbonate, flexible vinyl, stainless steel. **NOTE:** GerberMaskULTRA has a low-tack adhesive for easy removal from high energy surfaces. Rough, uneven, or curved surfaces may require a more aggressive adhesive. GerberMask II stencil mask with high-tack adhesive is available if greater substrate adhesion is required.

Gerber **GerberMask II** – Masking Material

GerberMask™ II is a durable, conformable 4-mil white vinyl film, coated with **aggressive** acrylic removable adhesive. Designed to hold during light sandblasting, acid etching, or paint applications. Removable, with no adhesive transfer. Suitable for use on glass, Plexiglas, stainless steel, unfinished and finished wood surfaces. **DO NOT APPLY GerberMask II TO FLEXIBLE VINYL FILM.** **NOTE:** GerberMask II has a high-tack adhesive that will adhere strongly to smooth, high-energy substrates, such as Plexiglas or polycarbonate. Requires some effort to remove. GerberMask I, with low-tack adhesive, may be more suitable for this type of application. GerberMask I can be used on flexible vinyl substrates.
