Opaque Cast Films > Avery Supreme Wrapping Film

Up To 10 Years

Avery Supreme Wrapping Film is a 80 micron super cast vinyl with clear permanent adhesive with Easy Apply RS and Long Term Removability (LTR). The adhesive system has air egress channels for fast and easy removal of entrapped air bubbles as well as RS technology, allowing film to stand-off from surface until pressure is applied. Designed as a paint replacement vinyl. Available in a strong choice of colours; including Pantone matches with the option of custom colour matching. Up to 10 years outdoor durability.

WEBCODE*: WF## / #

Suitable For: Total vehicle wrapping, fleet graphics, marine & transit wraps.

Opaque Cast Films > Avery Conformable Chrome Easy Apply RS

Up To 3 Years

Customers will be amazed at the effect that the Avery Dennison Conformable Chrome Easy Apply RS can create on vehicles of all types. The high gloss mirror-like finish gives a true chrome effect that is otherwise difficult or expensive to apply. With good conformability, you'll be able to apply to mirrors or raised features on the vehicle with ease.

Installers will love the Easy Apply RS adhesive technology features, enabling repositionability and slideability of the film, plus air egress channels that help eliminate bubbles and wrinkles - saving on valuable installation time. Designed for use in both the vehicle and graphics markets where high end chrome accents and special effects are desired.

Features:

- High gloss mirror-like chrome finish film
- Long term removable adhesive with Easy Apply technology
- Easy to reposition and slide with minimal force
- Conformable to simple shapes and curves
- Up to 3 years outdoor durability

WEBCODE*: SF100-843-S

Suitable For: Vehicle accents and personalisation, Motorsport graphics, Decorative graphics, All-terrain vehicles, Motorcycle graphics.

**PLEASE NOTE -
Polyester Films:
Applications on Acrylic:**

Polyester films are non-porous and testing on acrylic sheets is always recommended. Outgassing can cause air bubbles to appear after application. To reduce the outgassing effect, leave the acrylic sheet in direct UV Light (eg. Sun) for a minimum of one day.

The leading European heat transfer film, now available at Graphic Art Mart.

For more information about Chemica
Heat Transfer or Digital Films contact
Graphic Art Mart on 1300 GAMART
(426 278) or visit www.gamart.com.

Also Available at Graphic Art Mart Chemica's Digital Film Range.

Chemica has chosen Graphic Art Mart to be their leading Australian Distributor of the Heat Transfer range including the Cutable and Digital ranges. With experience spanning several decades, Chemica makes and distributes a wide range of high quality, heat transfer products for the textile market. Chemica distributes its products exclusively through an international network of specialized distributors, guaranteeing a professional service to all customers.

The majority of the Chemica products benefit from the Oeko-tex label, which is a fully-certified label demonstrating that the product is compliant with health and safety regulations within the standard class tests of 100 - class I and II, as Chemica products can be in direct contact with the skin and in order to obtain the above safety-certified label.

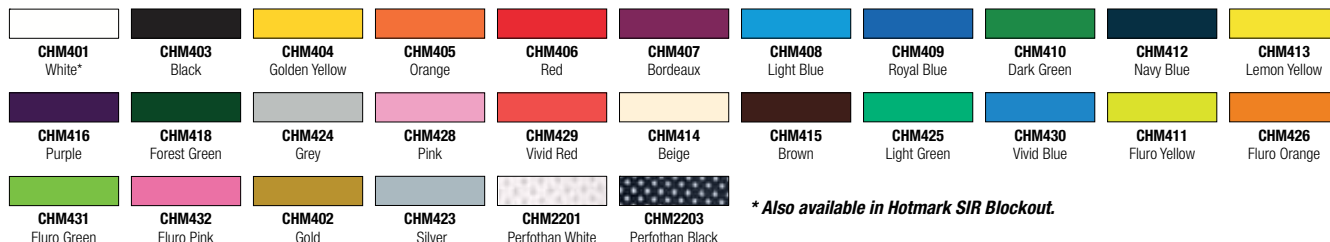

Heat Transfer Films > Heat Transfer Films

Chemica Hotmark - Polyurethane

WEBCODE: CHM##

Chemica Hotmark is a matte polyurethane material for heat transfer applications. Hotmark is a thin stretchable material of the highest grade and the it's most popular flex in the Chemica product range.

Suitable for: Cotton, polyester, acrylic & similar fibres.

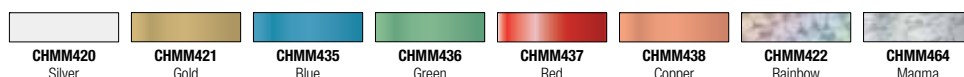

Chemica Hotmark Metallic - Polyurethane

WEBCODE: CHMM##

Chemica Hotmark Metallic is a high quality heat applied metallic vinyl for t-shirt and apparel decorating. HotMark Metallic is a polyurethane film which is flexible and durable. It features a slightly tacky backing sheet which makes the cutting, weeding and application of small letters and fine detail very easy.

Suitable for: Cotton, polyester, acrylic & similar fibres.

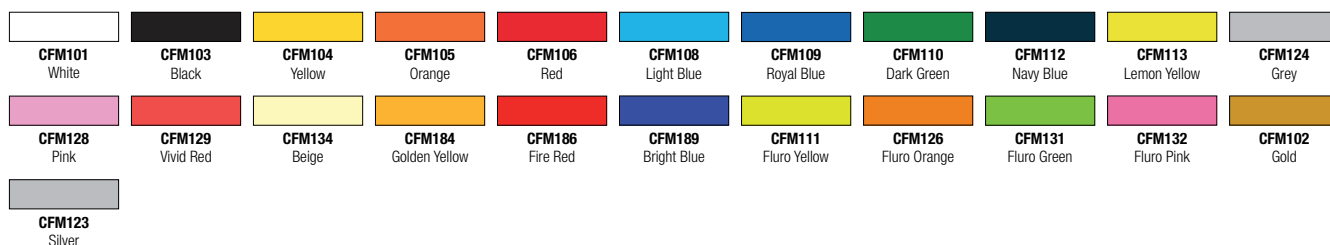

Chemica Firstmark - PVC

WEBCODE: CFM##

Chemica Firstmark is a semi-matte PVC material for heat transfer applications. It is the most economical product of the Chemica range for the budget conscious consumer.

Suitable for: Cotton, polyester, acrylic & similar fibres.

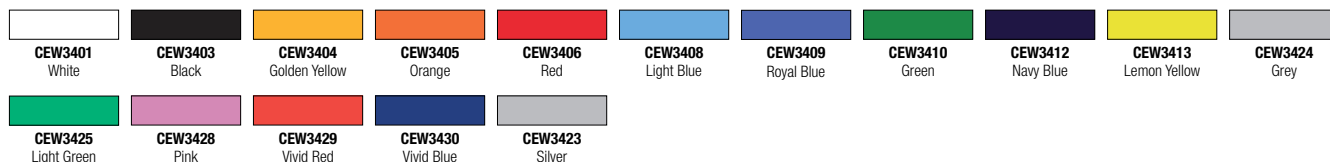

Chemica Easy Weeding - Polyurethane for Sportswear

WEBCODE: CEW###

Chemica Easy Weeding is a matte polyurethane material for heat transfer applications. Soft to the touch flex which offers hot peeling and has been specially designed for large images or lettering.

Suitable for: Cotton, polyester, acrylic & similar fibres.

Heat Transfer Films > Heat Transfer Films

Chemica TW Mark - Polyurethane

WEBCODE: CTW0##

Chemica TW Mark is a matte polyurethane film for heat transfer applications, very similar to "textile" touch and structure.

Suitable for: Cotton, polyester, acrylic & similar fibres.

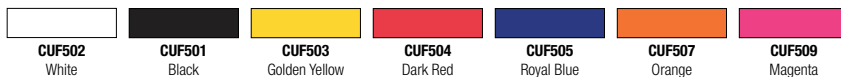

Chemica Upperflok - Flock

WEBCODE: CUF5##

Chemica Upperflok is a viscose flock material that has a velvet touch and feel for heat transfer applications.

Suitable for: Cotton, polyester, acrylic & similar fibres.

Chemica Galaxy - Polyurethane

WEBCODE: CGX11##

Chemica Galaxy is a polyurethane film with sparkling glitters for heat transfer applications.

Suitable for: Cotton, polyester, acrylic & similar fibres.

Chemica Allmark - Polyurethane

WEBCODE: CAM2##

Chemica Allmark is made with the same face film as Hotmark and is a thin matte polyurethane with a specially designed adhesive for nylons.

Suitable for: Nylon, cotton, polyester, acrylic & similar fibres.

Chemica Hotmark SIR - Blockout

WEBCODE: CSIR710

Chemica Hotmark SIR is a 110 micron, self-adhesive, white Matte polyurethane film for heat transfer applications onto 100% sublimated printed polyester. Total barrier for ink migration from the garment.

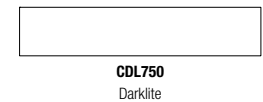

Suitable for: Cotton, polyester, acrylic & similar fibres.

Chemica Darklite - Photoluminescent

WEBCODE: CDL750

Chemica Darklite is a luminescent glow in the dark polyurethane material for heat transfer applications.

Suitable for: Cotton, polyester, acrylic & similar fibres.

Chemica Reflex - Polyurethane

WEBCODE: CRF497

Chemica Reflex is a silver highly reflective and certified polyurethane film for heat transfer applications.

Suitable for: Cotton, polyester, acrylic & similar fibres.

Chemica - Carbon Fibre

WEBCODE: CCF680

Chemica Fashion Flex Carbon Fibre is a matte polyurethane film with a special effects for heat transfer applications.

Suitable for: Cotton, polyester, acrylic & similar fibres.

RTape 4075 & RTape 4075 RLA (Release Liner Adhesive) - Medium / High Tack

WEBCODE: TAPEAR

RTape 4075 is a standard weight saturated paper coated with a high tack rubber adhesive designed specifically as a premasking of small and mid-sized die-cuts, pre-spaced vinyl and printed graphics. RTape 4075 is also available with RTape's RLA (Release Liner Adhesive) technology.

WEBCODE: TAPEAR_RLA

RTape 4775 RLA (Release Liner Adhesive) - High Tack

WEBCODE: TAPEARSH

RTape 4775 RLA is a premium weight saturated paper with high tack natural rubber adhesive. Conformable to irregular surfaces, sticks and lays flat to the exposed release liner around cut vinyl graphics to protect against wrinkling, tunneling and edge curling.

Maintape 575 PerfectTear - Medium / High Tack

WEBCODE: TAPEAM

MainTape 575 PerfectTear application tape takes the hassle and mess out of using transfer tapes. PerfectTear tapes tears cleanly with no stringy legging adhesive and with an improved adhesive system is extremely forgiving.

TransferRite 6560 - Low Tack

WEBCODE: TAPEATL

TransferRite 6560 is a low tack application tape featuring a high grade saturated paper backing with specially formulated latex and pressure sensitive adhesive. It can be used in sign shops for general purpose use as pre-spacer and decal transfer.

TransferRite 6582 - Medium Tack

WEBCODE: TAPEATM

TransferRite 6582 is a medium tack application tape featuring a high grade saturated paper backing with specially formulated latex and pressure sensitive adhesive. It Can be used in sign shops for general purpose use as pre-space and decal transfer.

TransferRite 6592 - High Tack

WEBCODE: TAPEATH

TransferRite 6592 is a high tack application tape featuring a high grade saturated paper backing with specially formulated latex and pressure sensitive adhesive. It Can be used in sign shops for general purpose use as pre-space and decal transfer.

TransferRite 1510 Clear Tape - Medium / High Tack

WEBCODE: TAPEATC

TransferRite 1520 is a clear polypropylene film application tape featuring a high tack natural rubber latex based adhesive. This clear film allows accurate registration and positioning which makes it ideal for multi-colour signs.

12**

Class 2 Reflective Films > Class 2 Reflective Films

Avery HV 1200 Series - Cast Vinyl Reflective Class 2 (Formerly Avery NV1300)

WEBCODE*: HV12##

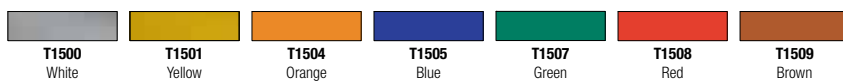

Avery HV 1200 Series is ideal for a wide range of large decals, fleet, transit advertising and architectural signage applications where conformability, durability and superior outdoor performance are required. It has excellent sheet stability and lay flatness for precise register and printing as well as excellent printability, conversion and application characteristics with a high gloss for superior appearance.

Avery T-1500 Series - Engineering Grade Reflective Class 2

WEBCODE*: T15##

Avery T-1500 Series is a high quality and durable reflective urethane film, featuring an enclosed lens retro-reflective material designed specifically for permanent traffic signage on flat aluminium surfaces. Complies to AS/NZ S 1906.1:2007 Class 2 reflectivity requirements.

3M 3200 Series - Engineering Grade Reflective Class 2

WEBCODE*: 32##

3M 3200 Series Engineering Grade Reflective is an enclosed lens, pressure sensitive adhesive-coated sheeting with an easy release liner, intended for production of non-critical traffic signs and pressure sensitive stickers.

3M Scotchlite 680CR Series - Cast Reflective Class 2

WEBCODE*: 680CR##

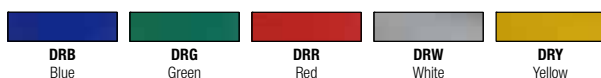

3M Scotchlite 680CR Series uses an enclosed-lens, retro-reflective film for screen printing or digital printing using solvent or eco-solvent inks. It's durable and flexible making it perfect for commercial vehicle graphics, signs, striping and railroad graphics.

Utopia DR Series - Promotional Reflective Class 2

WEBCODE*: DR###

Utopia DR Series Promotional Reflective film is an economy film with a permanent adhesive, offering exceptional value for money and easy printability using solvent and eco-solvent inks.

® Please Note: All 381mm media is punched.

Reflective Conspicuity Tape > Red / White Conspicuity Tapes

Avery V-5720 Conspicuity Tape - Red / White

Avery V-5720 is a single-ply micro-prismatic construction which provides superior durability and long distance reflectivity. It is a high reflective vehicle conspicuity tape for maximum cost savings and performance.

Colours Available: V5720 Red / White.

WEBCODE: V5720

3M Diamond Grade DG3 983-32 - Red / White

3M Diamond Grade Conspicuity Markings Series 983 is an edge sealed, highly retro-reflective micro-prismatic markings designed to mark the sides and rear of vehicles for enhanced visibility and detection. The reflective marking consists of prismatic lenses that are formed in a transparent, synthetic resin, sealed and backed with a pressure sensitive adhesive and clear poly liner. Conforms to ECE 104 requirements.

Colours Available: 983-32 Red / White.

WEBCODE*: 98332

3M Diamond Grade 983-10 - White	50mm x 45m	Roll Only \$207.20

Reflective Conspicuity Tapes > Fluorescent Reflective Tapes

3M Diamond Grade DG3 9963ES Fluorescent LDP Reflective Tape - Yellow / Green

WEBCODE: 9963ES

3M Diamond Grade DG3 9963ES Fluorescent LDP Reflective Tapes are edge sealed, durable prismatic lens reflective sheeting. These product is designed to be used for vehicle markings for greatly improved conspicuity. They will provide higher night-time brightness than glass bead based retro-reflective sheetings and higher daytime brightness than ordinary (non-fluorescent) coloured sheeting. Suitable for rigid-sided vehicles, objects, machinery and equipment. Conforms to ECE 104 requirements.

Colours Available: 9963ES Fluorescent Yellow / Green.

Fluorescent Reflective Tapes	Roll Size	Roll Price
3M Diamond Grade 9963ES	50mm x 15m	Roll Only \$79.00
Fluorescent LDP Reflective Sheeting	50.8mm x 45m	Roll Only \$287.00
Fluorescent Yellow / Green	76mm x 45m	Roll Only \$350.00
	100mm x 15m	Roll Only \$161.00
	102mm x 45m	Roll Only \$485.00

Reflective Conspicuity Tapes > Truck Curtain Reflective Tapes

3M Diamond Grade 987 Series - Truck Curtain Reflective Tapes

WEBCODE*: 987##

3M Diamond Grade 987 Series Truck Curtain Reflective Tapes is an edge sealed highly retro-reflective sheeting consisting of prismatic lenses formed in a durable transparent resin, sealed in a synthetic film and backed with an aggressive pressure sensitive adhesive with a protective liner. Highly reflective microprismatic markings with pressure sensitive adhesive for application to sides and rear of PVC curtain sided trucks, trailers, specialty trailers and other vehicles for increased visibility. Conforms to ECE 104 requirements.

Colours Available: 987-71 Yellow, 987-72 Red & 987-10 White.

Truck Curtain Reflective Tapes	Roll Size	Roll Price
3M Diamond Grade 987-71 - Yellow	50mm x 45m	Roll Only \$572.60
3M Diamond Grade 987-72 - Red	50mm x 45m	Roll Only \$572.60
3M Diamond Grade 987-10 - White	50mm x 45m	Roll Only \$572.60

ECE 104 Marked Films - Information:

What are ECE 104 Marked Films?

ECE104 Marked Films meet the regulations that establishes guidelines for the use of retro-reflective safety markings on the rear and sides of heavy goods vehicles operating throughout Europe.

Research has demonstrated that outlining the contours of vehicles with high visibility safety marking tape significantly reduces the number of accidents involving long and heavy vehicles. The visibility of a vehicle is increased leading to a better safety record for vehicle operators and other road users.

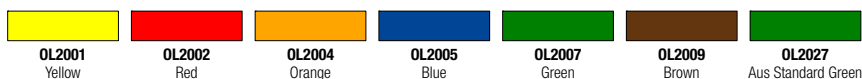

Overlay / Transparent Films > Overlay / Transparent Films

Avery OL2000 Series - Reflective Overlay Films

WEBCODE*: OL200#

Avery OL2000 Series Transparent Overlay Films are durable computer cuttable films designed for use as overlamine for manufacturing traffic control devices and guidance signage. Avery OL2000 Series is designed to be laminated over Avery's retro-reflective sheeting.

Suitable for: Overlaying on reflective films.

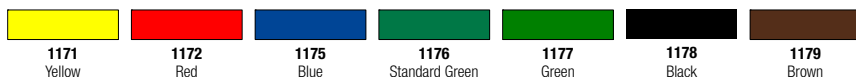

3M ElectroCut 1170 Series - Transparent Overlay Films

WEBCODE*: 11##

3M ElectroCut 1170 Series is a transparent, acrylic, coloured film used for application over 3M Reflective Sheeting to produce durable sign backgrounds, copy, and logos. The 3M 1170 film has pressure sensitive adhesive and was developed to provide optimal cutting, weeding, lifting, and transfer features when used with electronic cutting machines.

Suitable for: Overlaying on reflective films.

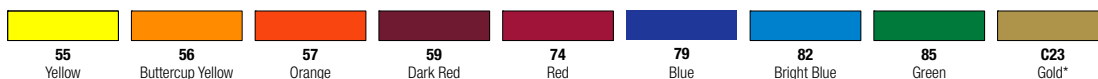

Aslan CT 113 Series - Decorative Transparent Overlay Films

WEBCODE: ASLT##

ASLAN CT 113 Series is the quality transparent colour series made for creative applications on signs and glass. Colours are applicable on top of each other so you can produce an almost unlimited range of shades. It has brilliant colour effects when illuminated, as well as on white or reflecting backgrounds.

Suitable for: Windows, glass, lightboxes, shop fronts & genreal signage.
