

ARLON

FLEXIBLE SUBSTRATES

► Flex

Premium Flexible Substrates

Arlon flexible substrates were developed primarily for improving large signage integrity in high-wind velocity areas while offering excellent performance and reliability.

DPF 390

DPF 390 is a white seamless 19 oz. wide-width flexible substrate designed for large sign faces where durability and uniform light transmission are important. DPF 390 is recommended for digital printing, PSA translucent vinyl and other film decoration methods. It is compatible with Arlon's Series 2500 translucent vinyl and has a 6-year outdoor durability.

For more information on DPF 390, click [here](#).

Flexface® FX V2

Flexface FX V2 is a 19 oz. flexible, reinforced, vinyl substrate coated with a UV protective FX coating. This flexible substrate is used in the sign and awning industries for backlit graphic applications. The FX protective coating is designed for pressure sensitive vinyl applications. Flexface® FX V2 is compatible with Arlon's Series 2500 Cast Translucent film and has an outdoor durability of 10 years.

ColorKote™ TC

Created for signage, awnings and canopies, ColorKote™ TC is a first-rate eradicable, white, cast 21 oz. PVC flexible substrate offered in 20 colors. Using premium inks, the color fastness is further protected with a unique clear topcoat to provide an extended warranty. ColorKote™ TC is designed for long-term corporate signage. Compatible with Arlon's Series 2500 and Plastiprint® FX, ColorKote™ TC has an outdoor durability of 10 years.
