

# REECE SUPPLY COMPANY

# Sign & Digital Supplies and Equipment

"Providing Excellence in Products and Services Since 1936"

### **Reece Supply Company, Inc.**

### **History**

Reece Supply Company is a wholesale supplier to the sign, screen printing and digital imaging industries and was established in 1936 in Dallas, Texas by Charles F. Reece. During the 1950's Charles sons Dick and Bob became active in the business, as did his daughter Joan. Dick Reece as well as Bob Reece has served as president of the company. Today both remain active as officers in the company as the third generation of family ownership continues.

Reece Supply Company began to expand its operation by opening distribution facilities in Houston, Texas in 1940 and San Antonio, Texas in 1957. Expansion continued with the addition of the Atlanta, Georgia location in 1976 and as the sign industry continued to grow the New Orleans branch was opened in 1992. In 2002 Reece Supply expanded westward with the opening of our El Paso, Texas location and Tulsa, Oklahoma was opened up in March of 2004. Charlotte, North Carolina, our newest location, was added in July of 2012.

Reece Supply Company will always strive to provide our customers and vendors with a knowledgeable and well-trained staff and offer the best service possible.

### **Services**

- Reece Supply locations maintain a large stocking inventory of products.
- Technical Support is provided on the products and equipment that we sell.
- · Professional account representatives will assist you with all of your needs and questions.
- · Local seminars provide training and education on new products and techniques.
- Participation in national trade shows allows our sales representatives to stay current with the newest products and ideas and to provide that information to our customer base.

### **Terms & Conditions**

### **Materials**

Every effort is made by Reece Supply Company to stock and distribute merchandise of the highest quality for the Sign industry and to back up all guarantees provided by the manufacturers.

### **Shipment**

We make a special effort to ship every order the same day it is recieved. We prepay all shipments of \$750 in value provided the shipment is made by motor freight, except as noted being F.O.B. our warehouse or factory. Aluminum and plywood sheets, as well as extrusions are exempt from this freight paid policy.

### **Claims**

Count the pieces in each shipment immediately upon arrival and check against the freight bill and packing list. Lost or damaged merchandise is the responsibility of the carrier, and in case of loss or damage, obtain a notation on the freight bill at the time of delivery. The Claim Agent of the delivering carrier must be notified within 24 hours for official inspection. The Claim Agent will advise as to the method of filing the claim.

### **Prices**

Prices are of necessity subject to change without notice. All prices shown do not include any applicable federal, state or local sales tax. Prices shown do not reflect any freight costs that would apply.

### **Warranties**

Under no circumstances shall Reece Supply Company be held liable for replacement of any defective products beyond the stated, expressed or implied warranties of the product manufacturers. Also, under no circumstances shall Reece Supply Company be held liable for any cost incurred by the product, whether in warranty or out of warranty, as stated by the product manufacturer.

### **Custom Products**

All orders for custom fabricated products shall be accompanied by all instructions required by the product manufacturer in order to insure correctness of the job. Under no circumstances shall Reece Supply be liable for the correctness of any custom product.

All specifications are subject to change without notice. All trademarks are the property of their respective owners.

Not all products are available at all branch locations. Call your branch for availability.

### **Terms & Conditions**

### **Returns Policy**

In the event that a stock product is recieved and does not meet expectations or provide satisfaction it may be returned to Reece Supply Company. The policy for this process is to contact Reece Supply Company in order to be issued a RGA number for the product. All returns of stock product must be shipped pre-paid, in resalable condition and are subject to inspection upon return for damage. Returns made after 30 days may be subject to a restocking fee. Custom or non-stock products are subject to the return policy of the manufacturer and may include a return fee as determined by the manufacturer.

### **Payment Terms**

Standard open account terms are net 30 days after the shipment of the product unless other arrangemnts are made. Standard open net 30 day accounts may be subject to a service charge of 1.5% per month when past due.

# **Sign Association Memberships**

## SignRayz LED Modules

AgiLight's new SignRayz LED Series offers three output levels of white, improved brightness and a wider viewing angle, allowing you to maximize light output and minimize material costs. SignRayz simplicity and flexibility provides bright, vivid and uniform illumination suitable for both large and small projects. From a standard face-lit channel letter or sign cabinet to the most wet or harsh environments, AgiLight's IP66 rated SignRayz will stand up to any test.

### **Features and Benefits**

- •Low heat for extended life
- •Solder-free connections for maximum strain relief
- •No UV, no IR emission
- •Operating temperature range between -40°C and
- $+60^{\circ}\text{C} (-40^{\circ}\text{F and } +140^{\circ}\text{F})$
- Constant current driven LEDs
- •IP66 Rated/Water Proof
- •Over molded design protects circuitry and connections
- •Protective Lens provides environmental protection
- Complies with FCC Title 47, Part 15, Subpart B for

Class A digital devices

### V Series

### **Features and Benefits**

- Whites are now 40% brighter
- Wide viewing angle
- Low profile modules
- · Six vivid colors and two whites
- Illumination for face-lit and halo-lit channel letters
- Constant current technology
- · Pre-wired modules for optimal placement
- Peel n' stick or mechanical fastening
- DC 12 V througout for mix and match compatibility
- UL, cUL Recognized, CE, CSA Certified

### **LEDStripe**

### **Features and Benefits**

- Daytime color when unlit
- High impact acrylic: UV stable, hydrocarbon insensitive, non-fading
- Can be cut-to-fit in the field and factory bent to an 12 in (305 mm) minimum radius
- Convenient, weatherproof connectors between sections
- Operating temperature -40° C to +70° C
- Five colors (Red, Orange, Amber, Lemon Yellow, Green, Blue) and White (7200K)
- Field cutting kit available
- Convenient corners, joint covers and mounting buttons
- Conforms to UL 48 standard, CE Certified and ETL listed

### **FlexiBRITE**

### **Features and Benefits**

- Bright, wide viewing-angle LEDs offer intense, uniform glow for perimeter/accent lighting. Flexible LED tubing.
- Operating temperature -40° C to +70° C
- Compatible with other SloanLED DC 12 V products
- Prewired, completely sealed, waterproof tubes can be cut-to-fit, spliced and resealed
- Optically modified silicone extrusion: UV stable, hydrocarbon insensitive, non-fading
- Convenient mounting clips and 5 ft (1,5 m) mounting tracks
- UL, cUL recognized, CE Certified

\*EESB Multi-Voltage Ballast provide even greater flexibility. Ballast for 800 mA High Output Rapid Start Lamps, 208/220/240/277/347 Volts, 50/60Hz (Min. start temp-30°F).

## Universal Lighting Technologies™ Signa® Electronic Ballasts

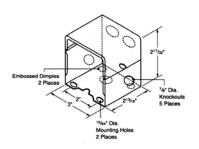

T12 Rapid Start HO Lamps, 108 to 305 Volts, 50/60 Hz.

- Universal input voltage
- Simplifies wiring
- Light output comparable to magnetic sign ballasts
- Arc Detection circuit prevents arcing in lamp sockets
- Three units cover applications from 1 to 6 lamps, 2' to 48'
- Cold temperature starting down to -20°F

## France Powerbrite Electronic Ballasts

- Only 3 ballasts required to cover 2-48'
- EBP12410-120/277V-IS ballast for 1-4, 10' lamps. Also for 1-4 8' T12HO lamps
- Use with 6' T8HO as well as 8' T12HO lamps
- · Easy to use instant start, parallel lamp wiring
- Title 24 Compliant. Class P thermally protected, Outdoor Type 2

All lamps are made to standard T12 HO lengths with Recessed Double Contacts (RDC) end caps.

Lamp life is based on 12 hour switching cycle using electronic warm start ballast.

The length of the lamp from the end of one RDC boss to the end of the opposite RDC boss.

Base Face to Base Face is Maximum Overall Length minus 3/4".

<sup>†</sup> Lamp wattage is based on nominal 315 mA +/- 5% operating current. Lamp operating current range 265 - 465 mA *Maximum Overall Length:*

- 1. Nominal Lumen Rating Daylight 83% of Cool White, Sign White, 77% of Cool White. Ratings are approximate initial lumens at 100 hours.
- 2. Ballasts: U-Lamps ballasted same as corresponding straight lamps.
- 3. Ballasts: Ballasts for 1, 2, 3 or 4 XtraLong straight lamps available from several manufacturers.
- 4. Rated Life: The "Rated Life" of a statistically large group of lamps is defined as the time when 50% of the lamps have failed and 50% have survived. This is based on 3 hours of operation per start.

## **Fluorescent Lamps**

# **EGL**, High Output Lamps

Big Boy<sup>TM</sup> High output lamps that can be used any time you can avoid using two shorter lamps of equal length. By reducing the number of lamp ends (lumen losses) more light per foot is achieved without unsightly center raceway shadows and with reduced labor and material costs: fewer ballasts, fewer sockets and much less wiring. They can be used as you would any other straight high output lamp. Most sign ballast makers supply ballast that carry up to four lamps, 9, 9 3/4 or 10 feet. Standard colors are coolwhite and daylight. Three sizes in T12 diameters: F108, F117, F120.

# Universal™ Lighting Technologies, F-Can Ballasts

- Support 35 to 400 watt lamps.
- Metal halide and pulse start metal halide units provide bright-white light and excellent color.
- High-pressure sodium ballasts are efficient and cost-effective.
- Color-coded leads reduce chance of miswiring.
- UL listed and CSA certified.

# Universal™ Lighting Technologies, HID Core & Coil Ballasts

- Support 50 to 1,000 watt lamps.
- Available in metal halide, mercury and high-pressure sodium.
- · Compact design.
- Color-coded leads reduce chance of miswiring.
- Floating lead wire (no capping and stuffing other wires).
- Kits include brackets, capacitors and starters when applicable.
- Ideal for most street lighting applications.

## **HID Lamps**

High Intensity Discharge lamps are classified according to the gas which is contained within the bulb to produce light.

## **High Pressure Sodium**

High Pressure Sodium lamps have the highest efficiency of the three lamp types but do not render colors as well. They have a long warm-up time but a comparatively short restrike time. High Pressure Sodium provides maximum lighting efficiency and operating cost. These lamps are utilized primarily for industrial, roadway and security lighting applications.

### **Metal Halide**

Metal Halide lamps give excellent color rendition with a neutral white light

output and excellent operating efficiency. In addition, these lamps have a long life and enable precise optical control. These lamps are designed for use in the lighting of retail outlets, offices, arenas, service station canopies and parking lots. These lamps require a higher starting voltage and have a longer restrike time than Mercury lamps.

## **Outdoor Lighting**

### **Acme, Floodlite Light-O-Line HO** Fluorescent Fixtures

All Lite-O-Line units are anodized aluminum and are priced complete with splice boxes tapped 3/4". Individual units supplied with a left and right splice box. Tandem units are supplied with left, right and center splice boxes. All shielded units are provided with slide-in clear acrylic shield. For Uplite use, use a snap-in clear acrylic with aluminum snap-on rails. For continuous runs over nominal 16" length, simply total any combination of units and specify the total nominal length of the run so that we can supply the proper amount (and type) of splice boxes. IMPORTANT - It is suggested that the shielded units be used in all colder climactic areas to insure efficient operation of the lamps.

### Holophane®, Panel-Vue®

Intended Use: For billboard lighting applications, specifically smaller billboards, such as panel boards and poster boards.

Features: Panel-Vue® Optics - The one-piece hydroformed aluminum reflector is contoured to distribute light through the borosilicate glass refractor. Precisely cut prisms direct the light onto the billboard for maximum efficiency and uniformity.

Housing - Rugged die cast aluminum housing contains the precisely engineered reflector, highly efficient integral ballast, Super Metal Halide lamp and socket, available on/off switch, and heavy-duty die cast door, sealed with harsh element resistant gaskets.

Mounting - Conduit (1 1/4" round or 1 1/2" square pipe) fits securely into the luminaire, clamped down to prevent rotation.

Listings: UL Listed to U.S. and Canadian safety standards. The luminaire is suitable for wet locations.

Reece P/N# Price 8032 514.29

# Holophane®, Sign-Vue® II

**Intended Use:** For billboard lighting applications, specifically larger billboards, such as bulletins.

Features: Sign-Vue® II Optics - The one-piece hydroformed aluminum reflector is contoured to distribute light through the borosilicate glass refractor. Precisely cut prisms direct the light onto the billboard for maximum efficiency and uniformity.

Housing - Rugged die cast aluminum housing contains the precisely engineered reflector, highly efficient integral ballast, Super Metal Halide lamp and socket, available on/off switch, and heavy-duty die cast door, sealed with harsh element resistant gaskets.

Mounting - Conduit (1 1/4" round or 1 1/2" square pipe) fits securely into the luminaire, clamped down to prevent rotation.

Listings: UL Listed to U.S. and Canadian safety standards. The luminaire is suitable for wet locations.

## **HO Flourescent Strips**

2 1/2" Depth without Lamp.

Height with cap assembled is not over 3 1/8 inches high.

### **Flashers**

# Signatrol, Model 30 Frame Type

One and two contacts fast speed, 115 volts, 50 or 60 cycle.

The standard unit is furnished with 50% cams, (single notch) so the "ON" and "OFF" periods are of equal length. The motor speed adjustment allows the overall cycle to be varied from one revolution of the cam shaft in two seconds (30 flashes per minute) to one revolution in four seconds (15 flashes per minute).

		Number		Flashing Arrangement	Reece	
Model	Type	of Contacts	F.P.M.	Action	P/N#	Price

30	55	5	4 on 1 off	5750	10	36175	323.40

# Signatrol, Model 50 High Voltage Type

The Model 50 high voltage flasher is designed to transfer the secondary side of a 7,500 up to 15,000 volt 30mA transformer for flashing neon tube signs. The standard unit, for 2, 3, 4, 6 or 8 circuit flashing is furnished with a one piece glazed porcelain distributor type top. The disc type motor with permanent magnet provides wide range speed adjustment of 35 to 300 flashes per minute.

Although this Model 50 high voltage flasher is not interrupting the transformer secondary but, transferring from circuit to circuit, under certain conditions, objectionable radio interference can be produced.

22-02	2	On-Off	20-306	66744	150.00
22-A2	2	Alternate	20-30	44507	150.00

## FMS, Model 33 Speller Flashers

Model 33 spellers are designed for applications where electric circuits are to be flashed in custom sequences such as with spelling or other animation. These FMS flashers have a variable cycle speed of from 2 to 90 seconds depending on the model.

		Reece	
Catalog #	Circuits	P/N	Price
33-S3	3	70592	315.00

### FMS, Model 33 Chasers

These chasers are most commonly used on flashing incandescent bulb signs where "dark spots" chase around a border or directional motion is incorporated into a field of bulbs. Can be used to chase neon, though it must be incorporated on the primary side of any transformers. The Model 33 chaser features molded terminal blocks, permanently lubricated bearings and corrosion resistant surfaces. Contacts on these chasers are rated to handle 10 amps each and are accessible for easy replacement. 115 Volt Motor, 50/60 cycle. UL and cUL listed. Also available in 220 volt.

### Flashes/Circuit per Minute

Model	Circuits	Cam Cut	Shade On	Shade Off	Watts
33-C4	4	8 lobe	270	210	4600

### FMS, Model 55 High Voltage Flasher

This model is designed to distribute the secondary voltage of a neon transformer. Unit will handle from 7,500 to 15,000 volts and distribute this high voltage up to 8 circuits from a single transformer. Referred to as a "neon animator". Available with 4, 6 or 8 contacts.

		Reece					
Model#	Contacts	Circuits	P/N	Price			
55-A4F	4	2 or 4	71100	395.00			
55-A6F	6	2, 3 or 6	39898	405.00			
55-A8F	8	8	61303	415.00			

### **Rocox, Chasers**

Patented variable speed Solid State Chaser Flashers (Not for flashing ballasts.) When flashing transformers, a Rocox Snubber is needed for each transformer. With totally silent operations and easy speed control (with a speed range of 50 to 600 flashes per minute per circuit) this Chaser is ideal for inside and outside operation. UL Listed.

4	A COLUMN

420	4	20	2300	115	7811	500.01	

Rocox, Solid State Flasher: One and two circuits, variable speed.

110	1	10	1150	115	7812	200.01
120	1	20	2300	115	7813	266.67
210	2	10	1150	115	7814	233.34
220	2	20	2300	115	7815	333.34

All flashers and chasers are enclosed in a regular bell box, therefore it is not necessary to enclose them in another box. To replace a mechanical chaser no wiring changes are needed.

### **Rocox**, Slaves

For loads greater than 20 amps per circuit use a Slave unit with flasher or chaser. The flasher or chaser will control the action of the lamps driven by both the Flasher-Chaser and the Slave unit. This also is enclosed in a weatherproof box.

					Reece

<sup>\*&</sup>quot;R" suffix for NEMA 3R steel Raintight enclosure.

### **Time and Temperature Displays**

### Wagner ZipVision

### STANDARD FEATURES

All ZipVision electronic message centers feature beautifully styled, aluminum cabinets with semi-gloss black polyurethane finish. In addition, they can operate at a wide range of temperatures ranging from -4 to 158 degrees Farenheit.

- \* Time/Temp featured with every display, with multiple sizes and configurations to fit every application.
- \* Ultra-bright LED's use the brightest LED technology available.
- \* Windowless design that's 40% brighter and easier to maintain.
- \* Long-life 100,000 hour LED's are up to 90% more efficient.
- \* LED technology and power supplies that run cooler, draw less power, and cost less to operate than others.
- \* Direct import and display of AVI files for animation.

### **Time and Temperature Displays**

### **Wagner ZipVision**

### STANDARD OPTIONS

Available for any electronic message center, ZipVision Displays offer an array of options designed to maximize the flexibility and potential of the display for any application. Standard options available include:

- \* Color. Chose from red, amber or full color.
- \* Configuration. Choose either single-sided or master/slave display depending on the location of the sign.
- \* Compatability. Compatible with Windows 2000, XP and Vista.
- \* Communication. All ZipVision signs are wired to accept RS485, RS232 and Ethernet. Also available with 802.11g (wireless internet), fiber optic, DSL modem, phone modem or RF.

### VISIONSPLAY SOFTWARE

The VisionsPlay software allows you to easily create and manage messages for your ZipVision display. With the VisionsPlay software you an easily create and edit messages, set play mode, color and speed, manage messages, set up your message download display schedule, view messages before sending them to the sign with the simulator and save messages and schedules for future use. You can snap a digital photo, download it to the photo re-sizer feature and display it on your sign in seconds.

VisionsPlay software includes special features such as:

- \* Count up, count down.
- \* Built-in display testing.
- \* Download, add and modify fonts.
- \* Insert time and tempurature
- \* Manage the display control with a user interface

Call your Reece Supply Representative for further information.

### France, P5G-2 Smart Series

- •Bypass feature for easy diagnosis of ground faults and primary wiring problems. Overrides the SCGFP for up to 30 minutes.
- •Diagnostic Circuits. LED indicates the reason for service, allowing for quick, easy troubleshooting.
- Secondary Circuit Ground Fault Protection
   (SCGFP) disables
   unit upon detection of arcs to ground in compliance with UL2161 and NEC requirements.

### Normal Power Factor -120 volts

Catalog	Secondary		Primary	Input	
Number	Volts	mA	V.A.	Amps	Price
15030 P5G-2E	15000	30	475	3.95	107.94

#### France FE1G Eneon

- •UL 2161 Listed Type 7 1996 and 1999 NEC compliant.
- •Self-adjusting 2,000 9,000 volt range.
- •Secondary circuit ground fault protection that detects arcs to ground and disables unit. (Power supply must be manually reset).

- Open circuit detection detects opens in high voltage circuit and disables units. (Power supply must be manually reset).
- •Visual red LED indicator that illuminates to indicate when a ground fault or open circuit has occurred.
- •Standard 6" mounting dimensions; the case mount matches all win dow/frame style transformers for easy installation.
- •No mercury migration and no jelly-beaning.
- •Vacuum encapsulated high voltage section protects high voltage cir cuitry and reduces heat.
- •Lightweight (2.2 lbs).

Catalog	Secondary		Primary	Input	Reece

### **Glass Tubing**

## **EGL Signmate Neon Tubing**

Signmate tubing is single-coated with proprietary phosphors to produce the world's most popular whites and colors. All tubing 15mm or smaller is packaged in 25 lb. boxes; 18mm in 20 lb. boxes. Diameter is available in 7mm to 18mm, four foot lengths.

#### Available Colors

Bright White 8300	3500 (white)
V3500 (white)	Blue E40
Warm White E3000 (white	Aqua E21 (Turquoise)
Snowhite 6500 (white)	Pink H37
4500 (white)	Green E10
V4500 white	Turquoise E20 (Bluish Turquoise)
7	Turquoise E12 (Greenish Turquoise)

#### **EGL, CL Designer Series**

The C.L. Designer series produces a higher output that significantly boosts the brilliance and visibility of rigid and vinyl plastic channel letter fascia. It is equally desirable for open neon signage and architectural lighting requiring super-bright whites, brilliant colors and long term color accuracy. The C.L. Designer series processes as easily as conventional phosphor-coated tubing and is available in four foot lengths in 7, 8, 9, 10, 11, 12, 13, 15, & 18mm diameters.

#### Available Colors

C.L. Designer White Tubing	Rare-Earth Colored Tubing
C.L. Designer 24 C.L. Designer 45	Coral Pink Horizon Blue
C.L. Designer 28 C.L. Designer 65	Flamingo Tropic Green
C.L. Designer 30 C.L. Designer 71	Violet II Seacrest
C.L. Designer 35 C.L. Designer 83	
C.L. Designer 41	

## **Glass Tubing**

#### **EGL, Signmate II Neon Tubing**

Signmate II tubing is first coated with a color stain that is baked-on, then with EGL's proprietary phosphors, the pre-staining step resulting in added color vividness and intensity. Available in five select colors, Signmate II tubing is excellent for borders. Care should be used if tight bending patterns are required as bend "washout" may occur.

Available colors	Color with Argon/ with Neon	Diameter
Neo Blue II	Deep Blue/Mauve	10 to 18mm
Clear Gold	Golden Yellow/Tangerine	8 to 18mm
VP Green	<b>Bright Green/Amber Orange</b>	8 to 18mm
Clear Brite Yellow	Bright Yellow/Orange	8 to 18mm

Signmate								
Diameter (mm)	8	9	10	11	12	13	15	18
Ft. per lb. average	18	16	13	12	11	10	8.5	7.1

#### **EGL**, Accuwall

Accuwall tubing is the machine-drawn colored glass that's easy to bend, opening a world of design freedom for neon sign makers. It offers a more consistent wall thickness and outside diameter and more uniform color than traditional colored glass tubing, allowing you to bend and process the sturdiest and most vivid signage attainable in less time, with far less breakage. Accuwall tubing is available uncoated or coated with EGL's propriety rare earth phosphors. All have fire-polished ends. Diameters are 10, 12, 15 mm.

<sup>\*</sup> Where Argon-Mercury is indicated above, Neon is a not recommended due to possible inconsistency of color. Specially-formulated phosphors achieve richest colors with Argon Gas Mixture (Blue/K-4)/HG.

All tubing packaged in 10 lb. bundles/cartons.

Approx. sticks per lb.: 10mm-3.25 sticks; 12mm-2.75 sticks; 15mm-2sticks.

#### **EGL, Cold Cathode**

Historically, "cold cathode" refers to luminous tubing which is larger than 15mm in diameter and operates on a minimum current of 60 milliamps. This larger diameter tubing is often used for interior cove and accent lighting. EGL cold cathode tubing is coated using the same quality coating techniques as is used on their small diameter tubing. This tubing is available in eight-foot lengths in 18, 20 and 25mm diameters.

#### 8-Foot Cold Cathode Lamp Tubing Available Colors/Description

Warm White 3000/ Warm White	White 2400K/Tri-phosphor
White 3500/3500 White	White 2800K/Tri-phosphor
White 4500/Cool White	White 3000K/Tri-phosphor
Snowwhite 6500/6500 White	White 3500K/Tri-phosphor
Green/Green	White 4100K/Tri-phosphor
Blue/Blue	White 6500K/Tri-phosphor

Horizon Blue/Blue

25mm sticks packed 24 per case; 18mm and 20mm sticks packed 30 per case.

#### **Voltarc, Neon Tubing**

Voltarc® offers the broadest selection of tubing colors and the most whites. Tubing is available in your choice of diameters, in single or double coated clear glass and coated or uncoated colored glass. The expansive selection of tubing options enables you to design neon signs and sculpture in a variety of colors, from pastels to deep, rich shades. Custom-tailored phosphor blends are supplied on special order.

Whites	Color with Neon	Color with Mercury
8300 Bright	Bright Tangerine	<b>Brightest Bluest White</b>
6500 Snow White	<b>Tangerine</b>	<b>Snow White</b>
4500 Cool White	Tangerine	Cool White

Sparkling Blue	Soft Rose	<b>Brightest Blue</b>
Clear Glass	Orange-red	Blue

<sup>\*</sup>Produces a low output color not recommended for use, except for special applications.

<sup>\*\*</sup>Not recommended for use with Neon due to inconsistency of color achieved.

<sup>\*\*\*</sup>Tight bends are not recommended.

### **Glass Tubing**

### **Voltarc, Double Coated Tubing**

Originated to provide the richest deepest shades obtainable. Supplied in 4 foot lengths and in 8 to 20mm diameters. Best used for borders and sweeping curves where the brilliance of the color can create an attention getting and dynamic contrast with other sign elements. Tight bends are not recommended because they cause the coating to thin out at these points.

#### **Double Coated**

#### **Electrodes**

### **EGL**, **Electrodes**

EGL electrodes have consistently raised the industry standards for reliability and performance since their introduction in 1930.

To ensure rigid quality control, all phases of manufacturing are performed in-house, including emission coating, inverter welding shells with lead wires, and sealing and centering the mounts in glass envelopes.

The latest addition to the growing family of EGL electrodes is the "ADVANTAGETM" electrode series, combining the features you need for the ultimate in brilliance, clarity, and longevity. All EGL electrodes are made in the USA.

#### Westrim, HC Housing Cap

Provides effective insulation cover for the GTO connection to the glass housing. Fits #100, #200, #200P or any 8-32 housing stud.

Catalog #	Reece P/N	Price
HC Cap	7497	.17

# Westrim, 2UP Neon Electrode Receptacle

Porcelain ceramic housing perfect for use in channel letters with integral housing transformers. Rated for 7500 volts.

Catalog #	Reece P/N	Price
2UP	7334	4.44

#### **Tube Supports**

## **EGL**, Grab-It™ Wireless Supports

Secure grip without wire twists. Glass tubing snaps firmly into the resilient "C" clip which encircles approximately 75% of the tube, providing a secure grip and eliminating the need for unsightly wire twists and associated labor costs. Light shines through the transparent clips, making them virtually invisible. Supports are spring-loaded with 1/8" travel to absorb shock and compensate for tubing irregularities, giving the entire sign a protective suspension. All supports provide a

1 3/4" stand-off height to accommodate "double-back" tube thicknesses. All sizes clearly marked on each tube.

Catalog #	Description	Package	Reece P/N	Price
614109	9mm	100	24372	.35

TS#12TW	1 3/4"/brass base/tie wires	32922	.27

#### FMS, Model 10T3 Tube Support

This support features a 10mm diameter threaded glass stand which is 1 3/4" from center of saddle to end of stem. The exclusive two piece spring temper brass base features two locking notches which hold the glass more securely than conventional one piece bases.

Preassembled with tie wire. UL listed.

Catalog #	Description	Package	Reece P/N	Price
10T3	1 3/4"	500	7361	.34

#### FMS, Model 835 Tube Supports

Designed for applications where more space is desired or necessary between the fluorescent tube and the sign face. The glass stand is 3 1/2" long with cut-off notches every quarter inch starting at 2". The 835 features a two piece zinc plated spring temper brass base. Preassembled with tie wire.

Catalog #	Description	Package	Reece P/N	Price
Model 835	3 1/2"	100	7366	36

### **Clear-Vue, Tube Supports**

For use wherever visual aesthetics are particularly important. Available in 70mm (2 3/4") height in clear acrylic.

Description	Package	Reece P/N	Pric
2 3/4"	500	7389	.50

#### **FMS**, Aluminum Extension Post

For special applications which require further distance between the fluorescent tube and the sign face. Sturdy construction and neat appearance with cutoff notches from 2 1/2" to

5 1/2" make it useful in many situations. Tube support not included.

Description	Package	Reece P/N	Price
5 1/2"	500	7368	.15

#### Gas

## **EGL**, Gas Transfer System

This system provides uninterrupted flow of pure Neon, Argon or special gas mixtures into tubes for neon signs, cold cathode, etc. The system employs a precision made filling valve which eliminates the use of two glass stopcocks. Clean gas flow is guaranteed, as compared to double-stopcock systems which require

constant lubrication and can allow air leakage into glass flasks. No entrapped grease vapors are automatically pushed into the neon tubes when the glass stopcocks are used. Once a system is installed, no gas losses are incurred when chang-

ing flasks with small, immeasurable volumes of remaining gases. No labor charges are incurred for each changing of replacements flasks.

Part No.	Gas Transfer Systems and Components

# Paige, Tuf-Hide® Sleeveless II GTO with Integral Sleeve

- •14 AWG GTO-15.
- •15,000 Volts/ 105°C.
- •C(UL) listed.
- •This specification covers flexible neon sign gas tube oil burner ignition cable suitable for indoor and outdoor use for 15,000 volt service.
- •Construction consists of stranded bare copper insulated with sunlight resistant Dielectric. The Tuf-Hide Sleeveless construction eliminates GTO sleeving and covering in neon installations.
- •Eliminates the high cost of sleeve and labor of pulling a sleeve over GTO cable.

### **Neon Processing Equipment**

## **EGL**, Vacuum Pumps

All EGL vacuum pumps are 2-stage rotary vane direct-drive pumps which reach an ultimate vacuum of 1 x 10<sup>-4</sup>mbar and have ISO-KF-25 flanges on inlets and outlets. All have anti-suckback valves and are equipped with Pneurop flanges, hose nipple, centering ring, O-ring and clamp.

Vacuum	Pump	Speci	fications
--------	------	-------	-----------

## EGL, #200 Vacuum Pump Oil

Incorporates 2 essential high vacuum characteristics: low vapor pressure which does not materially increase at temperatures up to 50°C; and viscosity sufficiently low for use at 15°C. Remains fairly constant up to 50°C. This oil is recommended to achieve maximum performance of all EGL direct-drive pumps.

Catalog #	Size	Reece P/N	Price
735200	1 ltr.	6993	35.00

#### EGL, Flushing Oil

Swift, safe removal of harmful sediment and contamination from high vacuum pumps. One or two flushings clean accumulated residues and protects pump. This oil is for flushing only, and should not be used for high vacuum operation.

Catalog #	Size	Reece P/N	Price
7365300	1 gal.	41510	47.50

#### EGL, #43 Vacuum Pump Oil

A custom blended general-purpose vacuum pump oil utilizing advanced feedstocks. This economical alternative to molecularly distilled fluids possesses a vapor pressure 2x10-4torr at a temperature of 25°C. It is particularly useful in applications where frequent fluid changes cause large volumes of fluids to be used.

Catalog #	Size	Reece P/N	Price
43	l ltr.	34608	47.50

## Voltarc, Kolor-Chek'R™

The Kolor Chek'R is a portable, low-cost checking device used to determine the color of unpumped sign tubing. Now available as a light weight model that can be hand held or stationary. Special filter and lamp fluoresce all phosphor colors.

Reece P/N	Price
6997	172.10

#### **EGL**, Ultraviolet Color Checker

A compact, lightweight 4 watt UV lamp for checking the color of phosphor coated tubing.

Reece P/N	Price
7287	115.00

#### **Westrim, Neon Hand Block**

Used for flattening neon tube bends. Clean with no harmful fumes. Leaves no marking on neon tubing. Withstands temperatures in excess of 1400°F. 1" thick x 3" wide x 7 1/2" long.

Reece P/N	Price
24328	11.79

## **EGL**, Lead Glass Stopcocks

Size	Reece P/N	Price
2mm	18099	50.00
4mm	6946	60.00
6mm	18100	75.00

#### **Westrim, Glass Files**

For quick cuts of glass tubing to desired lengths; files are carbon steel, 8" long.

Reece P/N	Price
6955	22.97

#### **EGL, Portable Slimline Tube Tester**

Battery powered high frequency generator for testing pumped neon tubes and fluorescent lamps, operates on four AA batteries. Tube being tested will illuminate in a pulsating manner if "good".

Reece P/N	Price
7286	92.00

#### **Neon Processing Equipment**

#### **EGL**, Swivels

3/16" Swivels are most commonly used for neon tubing; 1/4" are best suited for cold cathode work (18mm and larger).

Part No.	Available Sizes
671500	1/4" RAE (Right Angle) One-sided Swivel
672000	3/16" RAE (Right Angle) Double Swivel
672100	3/16" RAE (Right Angle) One-sided Swivel
672500	1/4" x 1 1/2" Straight Swivel

## **EGL**, Natural Latex Tubing

For gas and air supply lines.

Part No.	Description	Sizes
669500	<b>Blow Hose</b>	1/8" ID x 1/16" Wall
669000	<b>Hand Torch Hose</b>	1/4" ID x 1/16" Wall
669400	<b>Hand Torch Hose</b>	1/4" ID x 1/8" Wall
670000	<b>Crossfire Hose</b>	3/8" ID x 3/32" Wall
670500	<b>Ribbon Burner Hose</b>	1/2" ID x 1/8" Wall

### **EGL**, Spark Coil

110 or 230 Volt high-frequency generator used for detecting leaks in a pumping system. Models with an "S" are equipped with on/off switches.

Part No.	Available Sizes
740500	BD 10A spark coil 115V
740510	BD 10AS spark coil 115V

#### **EGL**, Bombarding Mica

Part No - 761500

# EGL, EZ Read Gas Pressure Gauge (Manometer)

Provides accurate readings of rare gases during neon tube or cold cathode filling. This gauge uses a greaseless stop-cock assembly designed to prevent the butyl oil from ascending into the manifold system should sudden pressure be applied to the liquid during operation. Connection is made with a glass compression fitting that will accommodate 12 to 15mm tubing. Each gauge is supplied with a calibrated scale and required gauge oil.

Part No.	Description
733600	EZ Read Gauge Complete with stand.
733625	EZ Read Gauge Glass Only.

### **EGL**, Digital Temperature Gauge

Designed for the neon bombarding process, this gauge provides accurate Fahrenheit or Celsius readings in the a range of 32°F - 650°F (0-325°C) and features a large, clear 3/4" LCD, enabling the operator to concentrate fully on bombarding of units.

Part No.	Description
734200	Unit with one nine-volt battery
734210	Replacement Thermocouple

## EGL, Maxi-Vac™ Single-Stage Borosilicate Oil Diffusion Pump

Provides pressures of  $1 \times 10^{-5}$  Torr at a pumping rate of approximately 8-10 liters/second. This pump has no moving parts for easy maintenance. Intake port is 25mm diameter with a compression fitting that accomodates 15 to 18mm glass.

Part No.	Description
734300	120V/60Hz Model
734305	Diffusion pump glass only
734320	Pancake heater mantle - 120V/60Hz
734321	Pancake heater mantle - 220V, 60Hz
734315	Heater controller 120V/60Hz
734316	Heater controller 220V/50Hz
713055	Pancake heater support ring
713050	Vertical support rod with base
713060	Diffusion pump clamp
735010	50 ml clear diffusion nump oil

## EGL, Milliamp Gauge

Electrodes must be bombarded at various power levels for complete conversion of internal emission coatings. This gauge enables you to monitor those power levels accurately for optimum electrode performance and repeatable results. Provides a reading of 0-1000mA (1 amp).

## **EGL, Digital Pirani Vacuum Gauge**

The TM-20 is a single station Pirani Gauge. It can display pressure in Torr, Microns, M-bar or Pascal units using a large easy-to-read LCD display with digital and bar graph readout.

Measurement range is from 760 Torr (ATM) down to 1 x 10 range (1micron).

#### **EGL**, Mercury Injector

The EGL Mercury Injector improves operator safety and dispensing accuracy. Pressing a button advances a plunger, dispensing 10 microliters (100mg) of mercury, equivalent to a ball 2mm in diameter - the correct amount for most argon-filled "neon" tubes.

### **Neon Processing Equipment**

# **EGL**, Analog Capsule Fill Pressure Gauge

Fill pressure can have a major effect on sign life and quality. Now you can monitor vacuum/pressure during the bombarding process with extreme accuracy and safety - with a high quality gauge designed specifically for that purpose. Features 4" easy to read face for precise indication of mm Hg/Torr from 0 to 40 in one unit graduations.

#### **EGL**, Regenerative Blowers

R-4 and R-5 Series high-efficiency regenerative blowers are oil-less, low maintenance, and ruggedly constructed with totally enclosed fancooled motor-mounted designs.

#### **EGL**, Bombarders and Chokes

**15 KVA Bombarder Transformers** are suitable for use with all applications and are generally the recommended choice for this reason.

**22 KVA models** are best suited for large scale, full-time production shops processing 15-25mm tubing and using primarily for 60-120 milliamp electrodes.

# EGL, Model 4600 Variable-controlled Choke

This is a DC reactance device using a dial Variac. When used in conjunction with the EGL milliamp gauge this model will provide precise control of bombarding levels combined with ease of operation and reliability.

## **EGL, 5-Point Crossfires**

Available in N = Natural Gas and A = Propane. Complete Systems include burners, side pipes, sliding base, T-splitter and 1/4" Venturi mixer. 790JC Series (790JC-N or 790JC-A) provides an even heat output system to bend or splice all diameters, from 8mm to 35mm. These both include manifold for burner tips.

#### **EGL**, Venturi Mixers

Some glassblowers construct their own mixer "T"s from glass or plumbers' parts, and use common valves to control air and gas flow. Although seemingly cost-conscious, that procedure has negative effect on the overall quality of the work. The reason - control. To make clean joints with lead glass, a stable, blue-violet flame is required. If a low cost setup is being used and difficulties are experienced, it is strongly recommended that a proper mixer be tried.

#### **EGL**, Ribbon Burners

Ribbon burners are utilized for creating sweeping curb effects and script type lettering for neon signs. They feature a brass burner bar to eliminate warping and side ignition, and an improved economizer valve with O-ring seals to eliminate leakage.

All models are equipped with a control slide to adjust flame length. The cast aluminum body rotates 360° on a collar flange which can be

bolted on a workbench or threaded onto an available pipe stand with a 17 point weighted base plate. Available in 16" and 24". Complete units includes economizer and bench flange. A floor stand is also available.

#### **EGL, Cannon-fire Crossfires**

Available in N = Natural Gas and A = Propane. Complete Systems includes burners, side pipes, sliding base, T-splitter and 1/4" Venturi mixer.

**BMT Series (BMT-7 N or BMT-A)** provides a knife-shape flame ideal for splicing and sufficient heat for bending glass 15mm or less.

**S21 Series (S21-N or S21-A)** provides a broad, high heat flame hotter than 5-point crossfires but more diffused hence better for bending than splicing.

## EGL, Manifold and Complete Pumping System for Neon Tubing

The EGL MAXI-VAC manifold system virtually eliminates the leakage, breakage, contamination and downtime common to older systems by eliminating the components that cause it. It features heavy wall, large diameter manifold tubing and large bore, grease-free stopcocks.

**System I** includes Borosilicate Glass Manifold complete with sturdy base 0-40MM HG/TORR fill gauge, highly accurate vacuum gauge complete with gauge adapter/stopcock, newly designed oil diffusion pump (for maximum pumping performance) complete with heater and all necessary mounting hardware.

Part # Description

Part # 716000 Complete system for gas flasks, 120V, 60Hz.\*\*

Part # 716005 Complete system for gas flasks, 220V, 50Hz.

Part # 716010 Complete system for gas tanks\*, 120V, 60Hz.\*\*

Complete system for gas tanks\*, 220V, 50Hz.

System II includes same as System I, including Series A70 or equivalent vacuum pump with stainless steel flex hose and adapter.

Part # Description

Part # 716025 Complete system for gas flasks, 120V, 60Hz\*\*

Part # 716026 Complete system for gas flasks, 220V, 50Hz.

Part # 716027 Complete system for gas tanks\*, 120V, 60Hz.\*\*

Complete system for gas tanks\*, 220V, 50Hz.

### **Neon Processing Equipment**

## **EGL**, Manifold and Complete Pumping System for Neon Tubing

The EGL MAXI-VAC manifold system virtually eliminates the leakage, breakage, contamination and downtime common to older systems by eliminating the components that cause it. It features heavy wall, large diameter manifold tubing and large bore, grease-free stopcocks.

System III includes same as System II, including choice of KVA bombarder and variable output transformer choke and milliamp gauge.

Part #	Description
Part # 716060	Complete system for gas flasks, Series A70 vacuum pump, w/15 KVA bombarder and choke, 120V, 60Hz.**
Part # 716062	Complete system for gas tanks, Series A70 vacuum pump w/15 KVA bombarder and choke, 120V, 60Hz**.
Part # 716078	Complete system for gas flasks, Series A70 ATO vacuum pump, w/22 KVA bombarder and choke,120V, 60Hz.**
Part # 716080	Complete system for gas tanks*, Series A70 vacuum pump, w/22 KVA bombarder and choke, 120V, 60Hz.

**System IV** (for gas tanks only) includes: same as System III, plus second Series A7- or equivalent vacuum pump with stainless steel flexible hose and adapter, two gas tank systems, EGL digital temperature gauge, set of replacement "O" rings, additional 50cc bottle of clear diffusion pump oil and 100 pairs of 15CL advantage electrodes.

Part No. Description

Part No. 716164 Complete system for gas tanks\*w/2 Series A70 vacuum pump and 22 KVA bombarder and choke, 120V, 60Hz.\*\*
\*Gas Transfer Systems included with System IV only.

#### **Neon Dimmers**

# **Diversified Components, Neon Dimmers**

Part # Product Description

NE-5 600 VA, 5.2 Amps, Strapmount, Push-On/Push-Off, field adjustable trim, UL Listed.

NE-10 1,000 VA, 8.4 Amps, Single Gang Faceplate, field adjust able trim, UL listed.

NE-15 1,500 VA, 12.5 Amps, Double Gang Faceplate, single Gang Backbox field adjustable trim, UL Listed.

NE-5-P Neon "Plug-In" Dimmer - 600 VA, 5.2 Amps, Rotary Switch, also dims incandescent signs UL Listed.

### **Rocox, Dimmers**

When dimming neon it is necessary to reduce the amount of neon footage per transformer approximately 50% for approximately 40% dimming. If more dimming is desired the footage per transformer must also be reduced. (For uniform dimming of more than one transformer it may be necessary to use a D-20 dimmer for each transformer.)

D20 - adjustable dimmer - for Neon or Incandescent.

#### **Neon Software**

## **Aries Graphics, Neon Wizard**

Neon Wizard is the only Windows graphic design program with features designed specifically for creating and producing

neon signs. The program includes everything you need to create neon tube patterns faster and

accurately. With Neon Wizard 5.0 you can send all the data needed for complex channel letter designs directly from Neon Wizard to your production equipment - without going through other programs. This software generates all the data required to create tube patterns, letter backs, faces and returns and mounting holes for housings and tube supports. For more details please see the software section of this catalog.

### **Aries Graphics, LED Wizard**

LED Wizard is the only Windows graphic design program with features designed specifically for creating and producing LED signs. Features of LED Wizard include:

\*Automatically lays out LED modules within channel letters, similar to Neon Wizard

- \*Lets you edit each path and adjust each module's position as required
- \*Follows LED-specific rules about spacing and positioning in the corners
- \*Keeps track of the total number of modules and power usage per run, listed on screen and/or in an Excel spreadsheet
- \*Captures Important data for estimating
- \*Gives total wattage to determine power supply

<sup>\*\*120</sup>V refers to all electrical components except bombarders and chokes (both are 220V primary).

#### **Special Mix Paint Colors**

Reece Supply offers custom color paint mixing service in the following lines of paint:

Grip-Flex Spraylat Series 400 Grip-Gard Plus Spraylat Series 20

Matthews Gloss VOC Spraylat Mark I Gloss & Satin

**Matthews Satin VOC** 

Color

Please contact your sales representative for more information.

# Akzo Nobel, Acrylic Grip-Gard Plus Polyurethane

Grip-Gard Plus is a high solids, two-component polyurethane enamel topcoat developed for

application to metal signage components. It is designed as an intermix toner system and can be mixed to match thousands of colors in any gloss level desired.

#### **Grip-Gard Plus Intermix Base Colors**

## **Akzo Nobel, Grip-Gard Hardeners, Reducers, Additives**

<b>Type</b> Polyurethane Hardener	Catalog # 10AHU-31243	<b>Description</b> A general purpose hardener used for spray application of Grip-Gard topcoats. Available in one quart and one gallon size.
Fast Hardener	004190	Grip-Gard Fast Hardener offers exceptionally fast flash and dry times resulting in increased productivity and significant labor cost savings to the sign manufacturer.  Available in one gallon size.
Brushing & Rolling Hardener	10AHU-33743	A general purpose hardener used for brush or roll pad application of Grip-Gard top coats.  Available in one quart size.
Non-Stop Reducer	10AHY-31199	A fast reducer suitable for small areas. Also suitable for larger areas when application conditions are under 65°F. Available in one gallon size.
Standard Reducer	10AHY-31372	A medium temperature reducer for any size job. Available in one gallon size.
Very Slow Reducer	10AHY-32177	A high temperature slow reducer for any job size and especially large surface areas. Tempurature above 85°F.  Available in one gallon size.
Gloss Modifier Addittive	10AFU-32396	Reduces the gloss level to semi-gloss. Available in one gallon size.
Accelerator 883 Additive	10AHY-31242	A catalyst reducer used in cool weather to speed up drying. Available in one quart and one gallon size.
Texture Additive	10AHY-32209	Used to produce a fine textured surface in the Grip-Gard polyurethane enamel. Available in one liter size.
Universal Brushing/Rolling Additive	10AHG-32313	Designed to convert Grip-Gard, Grip-Gard HS and Meta-Flex <sup>TM</sup> spray paint into a coating that can be brushed or rolled.  Available in one liter and one gallon size.
Flexible Additive	10AHU-33303	Allows Grip-Gard to be used on many rigid and flexible plastic substrates without cracking or chipping. Available in one liter size.
Wax & Grease Remover M600	10AHY-31206	A very good general purpose degreaser. It is suitable for cleaning and degreasing bare metal, existing finishes, primers.  Available one gallon and fifty-three gallon size.
Matte Paste	10AFU-31311	Available in one gallon size.
Extratop Accelerator	6202	Available in one quart size.
Waterborne Gun Cleaner		Available in five gallon size.

## PAINT

#### **Metal Paint**

# Matthews, Satin MAP® Base/Stock

Matthews Acrylic Polyurethane Satin MAP in-MDC• corporates the same quality performance of MAP but in a uniform satin finish. Ideal substrates include signage components, graphic arts and architectural metals. Satin MAP is also suitable for use on metal, wood and various plastics. Available in gallons.

## MATTHEWS, MAP PRIMERS/ CATALYSTS/REDUCERS/ADDITIVES

#### Matthews, 43 333 Suede Catalyst

43 333 Suede Catalyst provides an attractive low gloss suede-like texture that helps hide surface imperfections and reduces marring during assembly, shipping and installation.

#### Matthews, 43 999 Slow Catalyst

43 999 Slow Catalyst is a slower drying material that will provide more "open time" to reduce dusting and overspray roughness.

#### Matthews, 43 621 Brushing Catalyst

43 621 Brushing Catalyst was specifically designed for applications where a high viscosity or a mix with more body is required, such as needed for striping, lettering, rolling or brushing.

#### Matthews, 47 117 Accelerator C

47 117 accelerator will shorten curing time by approximately 50%. Formulated for use in conventional MAP and Satin MAP.

#### Matthews, 47 333 Anti-Crater Solution

Used to eliminate the problem of fish eyes or craters.

#### Matthews, 47 888 Flattening Paste

Used to acquire a gloss lower than high gloss.

#### Matthews, 47 444 Brushing/Rolling Additive

This product is designed to be used in the Matthews Acrylic Polyurethane topcoats to provide maximum leveling and flow characteristics when the product is not spray applied.

#### Matthews, 47 474SP Flex Additive

Designed to provide flexibility to the coating which will allow pliable substrates to withstand flexing and impact during fabrication or service without brittleness or cracking.

#### Matthews, 45 340SP Cleanz It

A spray gun cleaner - both a gun and equipment cleaner. Immediately after spraying is complete, use this to clean your gun, any lines with the gun, stirring sticks, containers, etc.

#### Matthews, 74 770SP HBPT

Matthews HBPT is a two-component, self-etching metal treatment surfacer. It etches the metal surface to provide outstanding paint adhesion and corrosion resistance while providing excellent filling properties to hide metal substrate defects. 74 7770SP or 74 7868SP will not provide good adhesion over anything except bare aluminum or steel.

#### Matthews, 74 200SP Zap White

This is a single component spray applied coating designed to provide a low gloss light diffusing white for the interior of channel letters and cabinetry. It has adhesion direct to aluminum and steel substrates. This product comes ready to spray and exhibits fast drying allowing faster production and turn around times in the shop. ZAP White is a low gloss white intended to minimize bright spots in illuminated signage and is not intended as a prime coat for Matthews topcoats.

#### Matthews, 74 102SP and 74 103SP MAP Converter

MAP converter allows for easy metallic application and control in addition to quick multi-color layouts. 74 103SP is formulated to be fast drying. Slow converter 74 103SP should be used in hot weather applications or when larger surfaces require open time for the blending of multiple passes. The use of MAP Converters in basecoat colors necessitates the application of a clear coat for exterior performance.

#### Matthews, 74 734SP/74 735SP Metal Pretreatment

This metal pretreatment is a quality, two-component, self-etching metal pretreatment. Designed primarily for use on raw aluminum and steel when the surface is scuff free and smooth.

#### Matthews, 74 760SP/74 766SP PT Filler

Matthews PT filler is a two-component, self etching metal pretreatment surfacer. Designed for use over clean bare metal only.

#### Matthews, 74 777SP Tie Bond Clear Adhesive

Tie Bond is a single component spray designed to provide excellent adhesion over various hard slick plastic substrates.

#### Matthews, 74 780SP/74 781SP High Build Etching Filler

Matthews High Build Etching Filler (HBEF) is a light-toned, two-component, self etching metal pretreatment surfacer. It provides excellent paint adhesion and corrosion resistance while providing superior filling properties to metal surfaces.

#### Matthews, 74 793SP Spray Bond Adhesive

This is a single, component spray applied adhesive designed to provide excellent adhesion over "hard to adhere to" metals.

## Matthews, 274 908SP/274 909SP Rust Inhibiting White Epoxy Primer

This Rust Inhibiting White Epoxy Primer is a two-component white epoxy primer that contains special rust inhibitors. It is an ideal primer for use over metal, aluminum, steel, masonry or wood.

#### Matthews, 45 330SP Speed Prep Metal Cleanser

Speed Prep Metal Cleanser is a substrate cleaner that has been specifically designed to remove waxes, grease, silicones and other contaminant's from bare metal and therefore eliminating avoidable adhesion problems.

#### Matthews, 287 437SP Acrylic Polyurethane Accelerators

High solids Accelerator 287 437SP is designed for use in Satin VOC and the Matthews U Prime system, but can be effective in conventional MAP and Satin MAP. This product offers a unique combination of rapid cure with an increased pot life not found in traditional accelerators.

# Matthews Ultra Low VOC MAP ® Paints, Satin

#### Matthews, Ultra Low VOC MAP® Satin Toners

A benchmark high-performance polyurethane paint that limits VOC to 50g/L or .4172 lbs/gal while delivering superior color and durability. MAP Ultra Low VOC is the cost-effective solution that will save you time and money on total cost per gallon. This new product formulation has 50%-67% solids, depending on color, resulting in better hiding and faster film build. The result is less paint being used and more efficient use of product per job. Available in gallons.

## PAINT

#### **Metal Paint**

# Spraylat, Mark 1 Intermix Colors Metal SPRAYLAT

Spraylat has introduced MARK 1, a new, high performance member of the Series 95 family of metal sign coatings. MARK 1 is an advanced metal sign paint process that uses a universal colorant system to provide both a compliant 2.8 VOC formulation and a conventional 4.0 VOC formulation in a single coating system. MARK 1 is available in a full range of glosses and an extended range of intermix colors though Spraylat's new Integrated Color Matching System. This coating system is also fast dry, smooth and very easy to apply in production. The weatherability of Spraylat's MARK 1 coating is excellent when applied over Spraylat's recommended wash primer or epoxy primer. Available in gallons.

#### **Plastic Paint**

# Akzo-Nobel, Grip-Flex™ Plastic Sign Paint

Grip-Flex translucent coating has superior resistance **AKZONOBEL** to fading and harsh outdoor elements. Because Grip-Flex is suitable for polycarbonate vinyl, flex face, acrylic and ABS, you only need one product for multiple types of plastic substrates. In addition, Grip-Flex's translucent colors are easy to apply, which reduces mottling and allows you to obtain the desired reflected and transmitted color.

# **Chromatic, Background Enamels and Primers**

Ideal for sign backgrounds where speed of drying is of critical importance. This high gloss enamel is designed for production environments where same-day recoat is desired. Available in White and Black - one gallon size and five gallon pail (white only).

#### Chromatic, Fast Dry Block Out White

This is a fast drying, high opacity coating that is used to "block out" previous painted sign faces and cover uneven colors of substrates. It is also used to prime new MDO surfaces and sand easily. Because of its exceptionally fast dry time, this product is most often used in production environments.

Size	Reece P/N	Price
Gal	9534	47.37

#### Chromatic, Metal & Wood Primer White

Made expressly for tempered hardboard, providing excellent adhesion and durability, while retaining the smooth finish surface appearance of the hardboard sheet.

Size	Reece P/N	Price
Gal	9536	47.37

#### Chromatic, #1080 Universal White Primer

These primers meet most sign and industrial needs. This quick drying product exhibits excellent adhesion to a variety of steel surfaces. A unique primer, this product may be topcoated with almost any paint system, including Bulletin and Lettering enamels, background enamels, lacquer, acrylic enamels, synthetic enamels and two component polyurethanes.

Size	Reece P/N	Price
Gal	9556	60.57
5 Gal	9557	283.34

#### **Special Mix Paint Colors**

Reece Supply offers custom color paint mixing service in the following lines of paint:

Grip-Flex Spraylat Series 400 Grip-Gard Plus Spraylat Series 20

Matthews Gloss VOC Spraylat Mark I Gloss & Satin

Matthews Satin VOC

#### XIM Primers

#### XIM, 100 Clear Flash Bond Primer/Sealer/Bonder

X-I-M Flash Bond #100 is a fast-drying premium quality primer/ sealer/bonder that helps solve the problems of popping, blistering, peeling and rusting when used as a seal coat for most paints. Flash Bond 100 helps provide maximum adhesion even on the smoothest surface. Available in one gallon container.

Size	Reece P/N	Price
Gal	9699	66.59

#### XIM, 400W White Bonder and Primer/Sealer

XIM 400W is a fast drying solvent based Bonder as well as Primer/ Sealer developed to solve many painting problems. Provides excellent sealing and adhesion to many hard-to-coat surfaces. Available in one gallon container.

Size Gal	Reece P/N	Price	
	9698	59.97	

## PAINT

### **Bulletin and Lettering Enamel**

## **Spray Mask and Special Coatings**

#### Spraylat, Sign Strip II

Sign Strip II is a spray-on, strip-off, plastic coating for masking irregular surfaces for decorating operations. It works well over painted surfaces, bare aluminum and steel, vinyl, etc. The main advantage of a spray-on, liquid plastic coating over masking paper or tape is its ability to conform exactly to any configuration, with no folds, voids or creases that could permit paint leaks. Sign Strip cuts easily with sharp cut lines with no edge lifting, thus no paint bleeds under cut lines.

Size	Reece P/N	Price
Gal	3960	44.34
5 Gal	3961	178.85
53 Gal	3963	1,703.58

#### Spraylat, Booth Strip

Spraylat, Booth Strip is a water-base strippable plastic film for spray booths that can be applied using standard spray equipment. It air dries to form a tough pigmented white plastic film. It has been designed to be applied to spray booth walls to collect paint overspray. The adhesion of the Booth Strip film to both bare metal and painted surfaces is such that it will not sag or fall from either the side walls or ceiling, but is still easily stripped during regular maintenance cleanup.

Size	Reece P/N	Price	
5 Gal	3959	152.73	

#### **Special Mix Paint Colors**

Reece Supply offers custom color paint mixing service in the following lines of paint:

Grip-Flex Spraylat Series 400
Grip-Gard Plus Spraylat Series 20

Matthews Gloss VOC Spraylat Mark I Gloss & Satin

**Matthews Satin VOC** 

Please contact your sales representative for more information.

## **Spray Mask and Special Coatings**

#### Tufbak, Masking Paper

This a treated white paper coated with a pressure sensitive adhesive. It is protected with an impregnated crepe paper and is used to cut stencils and as a spray paint mask. It works as an adherent on irregular surfaces such as rivets and corrugations. It prevents "bleed through". Pounce marks, pencils lines and colors are readily seen. Adhesive can be left on for a day or two and still be easily removed.

Size	Reece P/N	Price
48"x50yd	3965	370.50

#### Triarch CT-100, Medium

A decorative, protective texture coating for all masonry, properly prepared wood, and primed metal surfaces both interior and exterior. Provides a flexible, weather proof, breather type coating. Available in three aggregate sizes: fine, medium and course. Sold in 5 gallon pails.

Size	Reece P/N	Price
5 Gal	9805	95.00

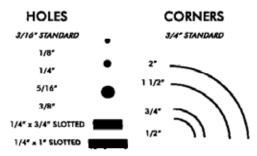

#### **Aluminum Sheets**

## Wrisco, Aluminum Sign Blanks

Wrisco Industries Inc. can benefit your sign blank needs with their new computerized blanking cut-to-length line. This state of the art line provides you with the high quality sign blanks and a quick turnaround on customs orders. Wrisco's blanking line offers: precision blanks of excellent quality; gauges - .024, .032, .040, .050, .063 and .080; ready to ship white stock blanks; custom size blanking available; all colors available in blanks with or without masking.

# **Standard Acrylics**

# Aristech, GPA

Aristech Acrylic Sheet is a continuous cast acrylic sheet, derived from a unique formulation. GPA is a general purpose acrylic sheet. It is solvent cementable and available in many standard colors, thicknesses and sizes. See Cross Reference Chart for sizes and colors.

#### **Chemcast GP**

Chemcast GP acrylic sheet is a lightweight, rigid thermoplastic material that has many times the breakage resistance of glass. Chemcast GP is ultraviolet light absorbing and thererfore very weather resistaint with outstanding exposure for many years without losing its surface gloss or mechanical properties. See Cross Reference Chart for sizes and colors.

# Plaskolite, Optix SG

This acrylic sheet is continuously processed, high quality acrylic sheet. Crystal clear, impact resistant and five times stronger than glass, SG is also weather resistant and non-yellowing. Available in standard colors, custom matched colors, high impact, green edged and patterned sheet. Use for any fabrication or market application, including signage, lighting and point of purchase, picture framing, skylights and displays. See Cross Reference Chart for sizes and colors.

# **Impact Modified Acrylic**

#### **Spartech Tuf-Glas®**

Tuf-Glass is a modified acrylic that is especially desirable for high-volume production programs where economy is a primary consideration. Tuf-Glas has the clarity and stiffness always associated with acrylics, combined with toughness at least seven times greater than standard acrylic. It is a tough acrylic sheet that combines exceptional weatherability that gives high performance for the cost factor. Available in reels and flat sheets in either smooth or matte finish in Clear or White

# **Spartech Crylex® Plus**

This is an ultra-modified acrylic: extruded Plexiglas®DR®. It's the toughest acrylic sheet available. In addition to its formidable impact strength (10 times greater than standard acrylic), it offers outstanding weatherability and stiffness, plus ease of fabrication. Available in reels or flat sheets, in either smooth or matte finish, in Clear or White.

# **Impact Modified Acrylic**

# Plaskolite, Duraplex SG-05 and SG-10

Duraplex impact modified acrylic is an economical alternative to polycarbonate, offering excellent weatherability without impact reduction. A wide range of forming temperatures and short forming cycles afford enhanced thermoforming capabilities not available in polycarbonate. Because it is ten times stronger than acrylic, Duraplex is shatter resistant yet optically clear while providing superior impact resistance. Duraplex sheet is ideal for sign, display, car accessory, window and door and skylight applications. See Cross Reference Chart for sizes and colors.

# Cyro, Acrylite SG

Acrylite SG sheet is a versatile thermoplastic sheet that is rigid, tough, lightweight and offers ease of fabrication and machining. Cutting, routing, drilling, forming and cementing can be performed on Acrylite SG sheet. Specifically designed for the sign industry, this sheet is ideal for use in channel letters, formed letters and shapes as well as back-painted signs. Offers the look of acrylic with the impact strength required for fabrication, handling, shipping and sign installation. All sheets are protected with paper masking. See Cross Reference Chart for sizes and colors.

# Aristech, Acrysteel® IGP

This product is made by the Continuous Sheet Casting process, unlike other impact materials that are made by the extrusion process. It is an engineered

thermoplastic acrylic sheet designed to give a "preferred balance" of physical properties and performance. All the advantages of a proved thermoforming acrylic sheet like Aristech GPA but with greater impact resistance to reduce sheet breakage in the fabricator's plant and during field installation. A high gloss, hard surfaced sheet available in custom and standard sheet sizes plus continuous reels. See Cross Reference Chart for sizes and colors.

#### **UV Resistant Polycarbonate**

# Spartech, Sungard®

This a co-extruded all polycarbonate UV-resistant sheet for the sign industry. Sungard preserves polycarbonate impact strength over time and its enhanced weatherability is achieved without sacrificing thermoformability and ease of fabrication. Available in both sides polished or with matte outer surface and a polished inner surface. All material is masked on two sides. Available in clear or white.

#### Sheffield, Makrolon SL

MAKROLON® GP general purpose polycarbonate sheet is a polished surface, UV stabilized polycarbonate product for use in glazing and industrial applications, and features outstanding impact strength and superior dimensional stability. MAKROLON® GP polycarbonate sheet's five year warranty against breakage, along with its UL 94 VO rating on gauges .220" and greater, make it cost effective in a wide range of industrial glazing, design, and structural applications. Available in clear or white.

#### **Letter Trim**

# Wagner, Jewelite® Trim

The plastic molding that add new dimensions to all cutout letters. It form-fits to any style letter. Adheres to plastic and other surfaces. No painting or polishing is necessary.

#### Wagner, Jewelite "Nicker" Tool

Used to notch plastic trim to allow for a smooth, uniform bend. Used for 3/4" to 2" trim.

#### Jobmaster, Hand Magnets

A useful aid in the application of trim cap to the plastic letter face.

Reece P/N	Price
3979	5.06

#### Wagner, Jewelite®, Handle Magnets

Ideal for holding Jewelite® trim in position during assembly. The convenient handles make moving and these magnets much easier.

Catalog No.	Description
HM34	1" magnet with 25 lbs of pull strength.
HM67	2" magnet with 50 lbs of pull strength.
HMC503	3 3/8" (extended side) magnet with 50 lbs. of pull strength.
НМС503В	3 1/2" (extended side) magnet with 50 lbs of pull strength.
HMC504	4" (2 extended side) magnet with 50 lbs. of pull strength.

#### **Letter Mounting Materials**

#### Westrim, Letter Mounting Blocks

Clear acrylic blocks for use with aluminum studs.

Dimensions: 1/2" x 1/2" x 3/4".

Reece P/N	Price
3971	.22

#### Westrim, Mounting Pads

Molded from clear acrylic. Made with rectangular holes through the pads to allow good adhesion. For use with #10-24 studs.

#### Westrim, Aluminum Studs

Threaded aluminum rods available in #10-24 x 3", 4"

Size	Reece P/N	Price
3"	3974	.26
4"	3975	.28

#### **Adhesives**

Lord Adhasivas

Lord Adhes	ives		LORD
Product	Applications	Working Time @ 72°F	Handling Time @ 72°
Lord 403/19	All plastics & unprepared metals.	Very fast - 2 to 4 minutes	6 to 8 minutes
Lord 406/19	Same as 403/19 with longer work time.	Fast - 6 to 10 minutes	15 to 20 minutes
Lord 410/19	Same 406/19 with longer work time.	Medium - 25 to 45 minutes	1 to 2 hours
Lord 7542 A/B	Plastics, prepared metals, SMC, FRP and foam.	Fast - 4 to 5 minutes	1 to 2 hours
Lord 7550 A/C	Trimcap, plastics, other non-structural applications.	Fast - 3 to 5 minutes	15 to 30 minutes
Lord 7660	Plastics and prepared metals; laminating and trim components.	Medium - 30 to 60 minutes	24 hours
Lord 320/322	SMC, FRP, primed metals rubber, foam, ceramic, stone and other thermoset plastics.	Medium - 30 to 60 minutes	2-5 hours
Product	Full Cure @ 72°	Sag Resistance	Comments
Lord 403/19	1 hour	Excellent	Fast room temperature bond with no surface preparation.
Lord 406/19	4 hours	Excellent	Longer work time than Lord 403/19.
Lord 410/19	8 to 10 hours	Excellent	Longer work time than Lord 406/19.
Lord 7542 A/B	8 to 10 hours (15 - 30 minutes @ 140°F).	Excellent	Odorless; nonflammable; cost effective; flexible. Can be heat accelerated.
Lord 7550 A/C	24 hours	Self Leveling	Clear. Fast room temperature bonding. odorless;flexible; nonflammable. Can be heat accelerated.
Lord 7660	72 hours	None (brushable and sprayable).	One part cross-linking structural adhesive. Provides initial tack for fixturing.
Lord 320/322	24 hours	Excellent	Rubber toughened, heat resistant.

#### For Metal Surfaces

All Metals - Lord 403/19, 406/19 and 410/19 adhesives will bond most metals with a simple dry rag wipe. Where gross contamination is present, chlorinated solvents work best to degrease and prepare metal surfaces for bonding (1,1,1 trichloroethane or methylene chloride). If these are restricted in the work area, use ketones, such as methyl ethyl ketone (MEK) or acetone. Isopropyl alcohol (IPA) can also be used. Gasoline, toluene, xylene or mineral spirits are not recommended because they may leave a residue.

Lord 7543A/B, 7550A/C, 7660 and 320/322 adhesives require the use use of metal surface primers after solvent cleaning and before bonding.

#### For Plastics and Composite Surfaces

All Plastics - Mechanical Abrasion - Use Grit Blast, Sand Blast, Grinding, Sanding or Scotch Brite® Scuff. Each of these processes removes dry contamination while increasing the surface area for improved mechanical adhesion. Some surfaces may only require a Scotch Brite scuff. A solvent wipe before and after mechanical abrasion is usually required. For ABS, Acrylic, Polycarbonate Surfaces - Use only isopropyl alcohol (IPA); other solvents may attack the plastic and weaken it. For PVC and Vinyl surfaces - Methyl ethyl ketone (MEK) or acetone is best for removing plasticizers from the surface.

#### **Adhesives**

#### **Lord® Adhesives**

Lord Adhesives offer advantages over welding and mechanical fastening methods because they bond dissimilar materials, provide improved appearances, insulate against galvanic corrosion and offer excellent environmental resistance. Adhesive bonding provides cost savings as well, due to reduced labor costs and assembly time. Chart below is a guide to choosing the proper adhesive for sign bonding applications.

# VINYL SIGN & AWNING SUBSTRATES

# **Flexface Vinyl**

# **Cooley-Brite Flexible Sign Products**

#### Cooley-Bright 0606 White

#### Cooley Group

Cooley's original backlit sign and awning material, Cooley-Brite 20-ounce features a scrim design that is nearly invisible to allow for maximum light diffusion, consistent translucency, and brilliant eradicable colors in backlit signs and awnings. The added protection of our Coolthane® topcoat formulation enhances cleanability and extends the life of the product. Cooley-Brite is treated with anti-wick, ultraviolet stabilizers, fungicides, and whiteners for excellent color protection, durability, and long life. 8 year warranty.

# **3M Flexible Sign Products**

#### Panaflex 945GPS

3M Panaflex Awning and Sign Facing 945GPS is flexible material with built-in dirt resistance on its smooth, semi-gloss surface. This durable substrate is white-pigmented vinyl with a reinforcing polyester scrim, used for creating signs and awnings. It can be decorated with pigmented translucent film or screen printed or piezo inkjet printed translucent film.

#### **Rivets**

# Marson, HP-2® Rivet Gun

This hand rivet tool has has square shoulder fulcrum pin made of cold-formed heat treated steel which prevents pin rotation that can elongate the engaging holes and cause premature tool failure in imitation tools. Other quality features include: precision die cast, high strength aluminum alloy body; drop forged carbon steel upper handle; and thick cushion-molded vinyl grips for comfort. The HP-2 sets up to (3/16" steel rivets and comes with four mounted nosepieces (3/32", 1/8", 5/32" and 3/16") and a service wrench.

#### **Punches**

Typical Size Ranges

# Roper Whitney, #5 Jr. and #XX Punches

This is a light duty portable punch for limited punching (1.2 tons or less). They're easy to carry in the pocket, on a belt or in a tool box. The No. 5 Jr. punch has a standard 1 3/4" throat depth while No. XX has a deep throat configuration to punch the edge. The XX may be used to punch light channels with 1" minimum inside dimension and 1 3/8" maximum flange. Both punches have optional mounting bases and are also available as kits with a standard assortment of round punches and dies in a durable plastic box.

# Roper Whitney, #7A, #8 Punches

Medium duty Portable Punches are for medium punching power (No. 7A - 2.5 tons and No. 8 - 5 tons.). They are highly portable and of a size that will fit any tool chest or truck locker. The leverage design of these tools allows two hand linear operation. These punches are similar except for punching capacity. They will punch and strip inside a 90° arc movement of the lever. The upper handle will not disengage when moved to either extreme. Options include a bench mounting base and a factory reversal of the upper handle to provide front pull-down operation when the tool's intended use is as a bench mounted

#### Roper Whitney, #20, #CTL 20

Heavy duty portable punches that operate through ball bearing action and rotary operating motion. No. 20 and CTL 20 are similar, except that the frame around the die pocket of the CTL 20 is machined to allow punching close to the web of angle iron (9/16" from web to center of hole). Options for these tools include a ratchet attachment to permit operation in close quarter, pipe handles to provide adequate leverage with minimal effort.

#### **Punches**

# **A&N Hole Punches**

The A&N sheet metal punch enables products to cut faster, cleaner and more efficiently than any other tool.

Some of the features which make the A&N Tool & Die punch so useful are:

Small Size Fits easily in one hand and small sign openings.

Quick Change Simply change standard round punch and die

Simply change standard round punch and die sets 1/2" to 1 7/8" fit the same base and pilot

pin.

Ease of Use Operation: (1)Simply drill a small hole through

the sheet metal to accommodate

the pilot pin.

(2)Place sheet metal and punch over the pilot pin and drive through with a few hammer

blows.

(3)The heat-treated and beveled cutting edge provides a clean-cut

hole.

**Convenient** Use in the shop or at job site.

Variety Many shapes and sizes available from 1/2" to 1

7/8" diameter.

**Flexibility** The standard round punches and dies all fit the

same standard base allowing for great flexibility.

A and N Tool & Die Punch Silhouettes

HM: Uses a 1/4" sq. pilot pin and a replaceable bolt in the

punch. Fits Kulka #584/585 & 530-1 &530-2.

Standard: Uses a 1/4" round pilot pin. Sizes range from 1/2" to

1 7/8". All fit the same base.

S2C: Uses two 1/4" round pilot pins. Fits Eagle #4734-2

211: Uses a 5/16" sq. pilot pin and replaceable bolt in punch.

Fits Union #22258-1

# Roper Whitney, Portable Notchers 540, 141 and 50 Series

#540 Series

These portable notchers are 90° and 45° blades and dies will fit only 541 and 542 tools. No. 541 features 90° blade & die. No.542 features 45° blade & die

#141, Portable Notcher

For fast accurate 32° notching. Hook nose jaws permit notching to exact depth without slippage and with minimum effort. Spring-return jaws.

#50, Angle Iron Notcher

This angle iron notcher is designed for notching or coping angle iron. No. 50 is portable and can be used in the shop or on the job site. Standard unit has 90° notching blade and die.

# **Metal Fabricating Equipment**

# Roper Whitney, Angle Iron Shears #4

The No. 4 shear with its standard blade is expressly designed to cut up to 2" x 2" x 1/4" angle iron (with varying degrees of dis-

tortion). A special blade minimizes distortion on up to 2" x 2" x 3/16" mild steel angle iron (with 1/8" thicknesses nearly distortion-free).

Catalog No. Description

140020040 #4 Shear with standard blade and 72" bar

handle.

350004070 Standard replacement blade.

140020041 Shear with 2" x 2" x 1/8" replacement blade. 350004025 Special 2" x 2" x 1/8" replacement blade.

250004150 Base replacement blades (set).

350004060 Replacement die (old style round).

350004007 No. 400 Rod Cutter Replacement Blade.

350004006 No. 400 Rod Cutter Replacement Die.

# Roper Whitney, Hand Seamers #44, 44r, 793

•Handy tools for comparatively light work.

•Wide, deep jaws machined for smooth

parallel fit.

•Form precise fold and seams.

•No. 44 has plain 3 1/2" wide blades.

•No. 44r is similar with a radius to prevent tearing of aluminum and other light metals.

•No. 793 has 3 1/2" wide blade with adjustable depth gauge.

# Roper Whitney, Letter Forming Brake #99

This unique small bending brake, with its slotted jaws and apron, is especially designed for bending sheet metal strips which have one or more bent-up edges or seams already formed; such as forming the "drum return" on metal sign letters. It may also be used for straight bending of sheet metal up to 12" wide.

# ng up

# **Wilder, Workhorse Power Slitters**

The Wilder Slitters cut evenly through sheet metal, plastic, veneer, truss plates, sheet rock, cardboard and many other types. The double handle lock-up device on the back gauge guarantees the correct position throughout the cut and allows for a quick and simple adjustment to vary the depth of the cut. The Wilder pulls material through the cutters up to 90 feet per minute with no length limitations.

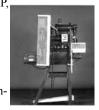

# **Metal Fabricating Equipment**

## Rogers, Presshear #10

This machine is both a punch press and shear. It has a cast welded

steel frame with jaw and gears that operates on 1HP, 1750 RPM motor. Three phase or single phase available. Foot operated, one-stroke safety clutch. Front is a conventional press and can be used for punching forming; regular die sets will fit this machine. Punches and dies from 1/8 to 1 inch are available; punch can be lowered to material for center punching and will remain until clutch is

engaged. Blades are tool steel and ground; can be re-sharpened and adjusted. Punch to back of throat 3" and punch is 2" long with 5/8" Shank. There is a bar hole for lowering punch by hand. Comes equipped with punch guard, blade guard, foot lever guard and gear guard for operator's protection. Up to 48 strokes per minute. Capacity - 18 tons.

#### Capacity

2 x 2 x 1/4" Angles Cap Rails

3/4" Rounds Punch 3/4" hole thru 1/4" material

3/4" Squares Stroke 2"

1/4 x 4" Flats Shut Height 6 1/4"

2 x 1/2 x 1/8" Channel

# Rogers, Presshear #30

This machine is both a punch press and shear. It has a welded steel frame, jaw and gears with a foot operated, one-stroke safety clutch. Operates on 2 HP, 1750 RPM motor - three phase of single phase available. Front is conventional press and can be used for punching or forming. Regular die sets will fit this machine. It has adjustable ram, hold-downs are easily adjusted; blades are tool steel and ground and can be re-sharpened and adjusted. Punches and dies from 1/8" to 1 inch are available. Punch to back of throat 3 5/8". Comes equipped with punch guard, blade guard, foot lever guard and gear guard for operation protection. Up to 48 strokes per minute. 30 ton punch capacity.

#### **Capacity**

3 x 3 x 3/8" Angles Punch 1" hole through 3/8"

1 1/4" Rounds Stroke 3"

1 1/4" Squares Shut Height 7 7/8" 3/8" x 6" Flats 3" Channel

# Rogers, Press #40

This punch press has a welded steel frame and gears that operates

on 2 HP, 1750 RPM motor - three phase or single phase available. It is foot operated, one-stroke safety clutch. Front is conventional press and can be used for punching or forming. Regular die sets will fit this machine. Adjustable ram. Holddowns easily adjusted. Punches and dies from 1/8 to 1 inch are available. Punch to back of throat 15 inches. Comes equipped with punch

guard, foot lever guard and gear guard for operators protection. Up to 48 strokes per minute

Capacity

Punch 1" hold through 3/8" material

Stroke 3"

#### **Ruoff Notcher**

This is a punch press with an adjustable automatic feed. It is precision designed for punching various shapes, along the edge of

sheet material. Sheet steel, galvanized iron, aluminum, plastics, cardboard or any material that can be punched can be handled by this machine.

Some of the many uses of the Ruoff Notcher: notched standing collar for duct work, notched standing seam for fittings, notched sections for sign word, and notched flange for metal letters.

This notcher can make 240 notches a minute. Conservatively estimated this is 20 times as fast as hand notching.

By a simple adjustment, the depth of notches can be regulated from 1/8" up to 7/8". Space adjustment is just as easy. Distance between notches can be adjusted from 5/16" to 1 1/8".

The Ruoff Notcher handles all types of flat materials without adjustment. Standard male and female dies provide a 15° notch. Other patterns are available. The Long-Life dies are easily removed and replaced. The punch and die can be sharpened as many as 8 or 10 times.

#### **Panel Saws**

# **Safety Speed Cut, H Series**

The H-Series offers full-sized vertical panel saw productivity in economical machines. H-Series saws cut within 1/32" on a wide variety of panel materials up to 13/4" thick, and are available in three standard crosscutting widths, 50", 64" and 73". H-Series saws are used in all kinds of panel processing appli-

#### Standard Equipment

- •3<sup>1</sup>/<sub>4</sub> Hp, 15 amp industrial duty saw motor.
- •Zinc plated 1¾"steel guide tubes.
- •4 Nylatron roller bearing systems.
- •Adjustable vertical and horizontal rulers.
- •Thin material pressure guard.
- •Spring loaded counter balance system.
- Injection-molded plastic material rollers.
- Quick change from vertical to horizontal cutting.

# SawTrax. Signmakers Package **Series**

Sign shops cut a variety of materials from MDO board, plastics, thin sheets of aluminum, Dibond, ®, Foam-cor®, Sintra PVC, acrylics, Gatorfoam®, Lexan, plastics, Nu-Alum®, White Wood Smooth. AlumaCorr<sup>TM</sup>, Poly-Metal, SIGNABOND, DIBOND, GATORFOAM, SINTRA, Coroplast®, COREX, more materials. These machines can cut all Sign materials up to 1.75" in both directions, veritically and horizontally with saw or knife. Compared to Mat Cutters that only cut some materials in limited thicknesses in only one direction, they don't restrict what you can use, or what size blank you can make. You no longer need to buy a panel saw and a mat cutter: you can have both in one machine.

#### The Accessory package included with these machines are:

Stop, Bar and Measuring Tapes Folding Stand (attached at factory) Wheels for the frame Spinning Saw Insert Dust Collection Kit Upgrade Spring Hold Down **OLFA Knife Insert** 

#### The Standard features also include:

Accu-Square Alignment System, Sealed Roller Bearings, Powder Coated Steel Frame, Retraction Mechanism, Saw Cord Holder, 2 Carriage Locks, Strip Support, 1/8" Wall Guide Tubes Makita 5007N Saw, Saw Cover with blade viewing port, Horizontal Measuring Tape,

Vertical Measuring Tape with Pointer and Spring Tensioned Band,

#### Welders

# **Southern Stud Weld, Capacitor Discharge Stud Welding Systems, Accessories and Equipment**

The easiest, fastest way yet of attaching Plexiglas™ to aluminum/Alucobond<sup>TM</sup> routed frontal faces of fabricated metal signs. Used for structural fabrication, reverse channel letter supports, plexiglass to routered face; tap pad stud for stand off applications, neon tube supports, and reverse channel letter clips. Capacitor Discharge Stud Welders have ball bearing shafts and adjustable spring pressure and are the best units for sign industry applications to prevent reverse side markings.

# Southern Stud Weld, TS-308 **Complete with Gun and Cables**

The TS-308 stud welding system incorporates microprocessor control. The system will automatically adapt itself to supply voltages between 110V-240V and supply frequencies of

# Southern Stud Weld **Sover BMS-8N Stud Welding** System

The BMS-8N is a high quality stud welding system featuring microprocessor control, lightweight and compact design. Southern Stud Weld offers the BMS-8N as a complete welding package, including a PS-1K contact gun, the capacitor power source, all

required cables, a complete set of collets and tools, and the operation and maintenance manual all inside a rugged plastic carrying case. Will weld aluminum fasteners up to 1/4" diameter and up to 5/16" diameter in other metals.

# Southern Stud Weld, BMS-10N **Stud Welding System**

The BMS 10N stud welding system is a more powerful CD welder than the smaller 8N. It can weld steel studs up to 3/8" in diameter (5/16" diameter Aluminum). The system is universally adaptable to different welding situations. The microprocessor controller ensures consistent weld parameters.

#### OTC, MIG-135 Welder

The MIG 135 is the ideal solution for small welding jobs and repairs. This has been a long time favorite seller with sign shops. The MIG 135 utilizes a special weld spool gun, provided by OTC. Since the wire spool is incorporated in the torch, welding is possible up to 25 feet from the power source.

The MIG 135 comes with five separate welding modes: MAG welding of mild steel and aluminum, MIG welding of stainless steel and galvanized, arc spot welding. By utilizing small wire diameters of .025" and .030", the MIG 135 is capable of high speed welding for extremely thin materials, thereby eliminating slow, more tedious TIG processes.

# **GRAPHIC FILMS / SUPPLIES**

# **High Performance Vinyl**

# Gerber 220 Series

High performance 2 mil cast vinyl specifically developed for Gerber by 3M for optimal Gerber EDGE printing and for vinyl cutting, weeding and application. Clear, pressure sensitive adhesive allows production of attractive two-way markings. Excellent durability with five to eight-year exterior life. *Available in 15" and 30"*.

#### Thermal Materials

# R Tape/SEF FlexCut

FlexCut is an exclusive heat transfer flex-film, suitable for plotter cutting. Made of 100% polyurethane, FlexCut gives a very thin, stretchable and resistant decoration, offering an amazingly soft and glazed surface. Available in 15"x10 yd rolls.

# R Tape/SEF FlexCut Sticky

FlexCut Sticky is a PVC free - water based - 100% Polyurethane heat transfer film.

FlexCut Sticky has a low tack sticky carrier allowing very fine cutting and fast weeding. Available in 15" x 10 yd rolls.

# R Tape/SEF FlexCut Sweet

FlexCut Sweet is a "screen printing like" 100% polyurethane heat transfer film.

FlexCut Sweet has a "non-sticky" liner. Very stretchable and incredibly soft - great "screen printing" effect. Available in 15"x10yd

# R Tape/SEF Tattoo

TATOO is the achievement of years of R&D on printable polyurethanes. Suitable for eco-solvent and solvent printing. Very light, very stretchable with high washing fastness. TATOO is PVC free. Available in 15"x10yd rolls.

#### R Tape/SEF ClearFlex

ClearFlex is a transparent polyurethane flex film, developed for ecosolvent or solvent inks. Extra light and stretchable, ClearFlex offers a great solution for all white fabrics.

Once printed and applied ClearFlex is so thin and stretchable that it almost feels like a screen printed image. Available in 15"x10yd

# R Tape/SEF VelCut

Velcut EVO is a high-quality heat sealable flock-film for plottercutting. It has been for years a confirmed best seller. Very easy to cut and peel off, it comes in a wide range of colours.

Velcut Premium offers incredibly high resistances and it answers positively the most severe ecological requirements. Available in 15"x10yd rolls.

Please note printed colors are not exact. Consult manufacturer's color swatches for more accurate definitions.

# ThermoFlex® Sport

ThermoFlex Sport is a thick, durable film material designed to bridge the gaps in open-mesh athletic jersey. It can be heat pressed at a relatively low temperature (300°-320°F) and short dwell time (8-10 sec.) which minimizes dye migration from colored polyester jersey mesh. ThermoFlex Sport can also be transferred to nylon jersey using the lowest temperature (300°F) and the shortest dwell time (8 sec.).

13.75" x 10 yards. All colors 65.70 each.

#### ThermoFlex® Xtra

In addition to nylon and leather,

ThermoFlex Xtra will adhere to siliconized materials with sufficient surface texture for the adhesive to grip, when transferred according to directions. Thermoflex Xtra also incorporates the same features of ThermoFlex Plus, including easier handling, cutting and weeding from the addition of its thicker polyester carrier, and low tack carrier adhesive that enables easy weeding without lifting the cut image from its carrier. 15" x 10 yards. All colors 89.90 each.

#### **ThermoBanner**<sup>™</sup>

ThermoBanner<sup>TM</sup> is an economical material designed for application to heat sensitive surfaces such as coated canvas, coated nylons and most vinyl or plastic coated surfaces. Typical applications include banners, awnings, umbrellas, tire and trailer covers.

ThermoBanner<sup>TM</sup> can be heat transferred at low temperatures with very little pressure, so application is possible with hand irons and

ThermoBanner 2<sup>TM</sup> exhibits the same great durability with a polyester backing for easier weeding.

#### Call for pricing.

# **ColorPrint™ Solvent Clear**

This is a clear polyurethane transfer material designed for printing with solvent or eco-solvent inkjet printers and is available with a matte or gloss finish. ColorPrint Solvent Clear is designed for use with white and light colored cotton, polyester and cotton-polyester blend fabrics. These films require a somewhat higher temperature (330°-340°F) with firm pressure for 17 seconds.

20" x 5 yds. Available in Clear only, 35.75 each.

P/N 76166

Please note printed colors are not exact. Consult manufacturer's color swatches for more accurate definitions.

#### **Cutters**

# FSC Substrate Cutter

The FSC unit can be wall mounted or free-standing to meet your work flow requirements. The cutting capacity in height is 65" with no length restrictions. Fletcher's technology results in clean, accurate and debris-free cutting, allowing the FSC unit to be placed in same area as digital printing equipment.

The cutting head design features quick

interchange blade and wheel cutting tools for processing today's popular rigid substrates.

When a new substrate enters the market, Fletcher has the ability to develop a new cutting tool, avoiding machine obsolescence. Includes Laser Sight Line Cutting Guide, adjustable for knife or wheel cutting operation, that projects a cut line on the substrate, eliminating guess work and costly errors in a post-printing process.

P/N 47498 3,308.00

#### Titan® Board Cutter

The Titan provides straight, square and accurate cutting of light board materials up to 1/2" thick and flexible materials. One-piece aluminum base with integrated blade cutting track and trimming surface construction. The Titan has a "Lift and Shift" hinged rail assembly for ease of loading material together with "Power Grip" cutting head for push and pull cutting convenience.

#### **Laminators Omega Signboard**

This hardwood plywood core is lighter and stronger than MDO. The hardwood core is a premium grade, rigid, exterior furniture grade plywood with smooth, tight, sanded veneers for optimum surface beauty. Is is also less likely to have gaps or voids in the inner-plys, which is common in many MDO boards. The surface is a .012 inch thick, prefinished, brilliant white vinyl.

Dimensions		P/N	Price
4' x 8' x 1/2"	G1S	8465	<b>76.7</b> 1
4' x 10' x 1/2"	G1S	8466	108.93
4' x 8' x 1/2"	G2S	8467	85.07

# **Alumet Sign Panels**

Aluminum Composite Material (ACM) Sign Panels are composed of a thermoplastic core of low density polyethylene, bonded to two sheets of aluminum using a sophisticated bonding process involving chemical adhesives and high temperatures. The painted surface of the aluminum sheet is coated with a wax free high performance polyester coating. The painted surface is protected with a strippable masking to prevent scratching.

	60" x 50 yd	P/N 25016	804.51

#### **IJ180-10**

Use this 2 mil, opaque film to produce medium to long-term graphics using selected piezo ink jet printers. Applications include interior or exterior vehicle graphics, signs, emblems and striping. The film offers excellent hiding power and has pressure-activated, repositionable adhesive.

Media Size	54" x 50 yd	P/N 8403	807.51
	60" x 50 vd	P/N 28586	897.24

#### IJ170Cv3-10

This value-priced 2 mil cast film is designed for piezo inkjet printing for wraps, fleet graphics, watercraft and signs, and application to flat-to-moderate compound curves, corrugations and rivets. This pressure-sensitive film features Comply  $^{\text{TM}}$  v3 Adhesive with an invisible pattern, great air release and lifting resistance from deep contours. Long-term and removable.

Media Size 54" x 50 yd P/N 68948 722.88

#### IJ3552C

This 2 mil film is intended for short-term vehicle graphics where fast, easy installation, and clean, easy removal is required. Applications include automobile, bus, commercial vehicle or fleet graphics as well as general signage. This film is designed to be piezo inkjet printed.

Media Size	54" x 50 yd	P/N 8578	647.59
	48" x 50 vd	P/N 8577	575.64

#### **DPF 6000XRP**

DPF 6000XRP, a 2 mil gloss white cast film with X-scape Technology. DPF 60000XRP has bubble-release, tinted, repositionable, permanent pressure-sensitive adhesive that allows for speedy installations while maintaining high enough tack for long-term bonds. This premium quality cast face stock with a lay-flat liner is designed for large format graphics. The adhesive provides excellent opacity, easy installation and superior conformability around rivets, curves, and contours. Rated for outdoor durability up to 7 years (unprinted).

Media Size	30" x 50 yd	P/N 68889	300.00
	48" x 50 yd	P/N 68891	480.00
	54" x 50 yd	P/N 68893	540.00
	60" x 50 vd	P/N 68894	600.00

#### **DPF 6000**

DPF 6000 is specifically formulated for eco-solvent based inkjet printers to give the ultimate in resolution and quick drying. This 2 mil film features a face stock with superior conformability and an adhesive that facilitates easy installation. With an outdoor durability of 7 years unprinted, DPF 6000 is the perfect film for fleet or vehicle wraps, decals and markings over flat, corrugated, riveted or seamedsurfaces. A variety of sizes are provided to meet most applications.

Media Size	30" x 50 yd	P/N 41254	244.66
	48" x 50 yd	P/N 11651	391.44
	54" x 50 yd	P/N 11653	440.38
	60" x 50 yd	P/N 11655	489.31

# MPI1005 Supercast Easy Apply RS

A 2.1 mil premium gloss, white, opaque film, designed for use in fleet and vehicle graphics. Avery Dennison's Easy Apply RS™ Technology offers the benefits of reduced wrinkling and air entrapment inherent in the application of graphics, as well as repositionability and slideability for exact positioning. Up to 9-year outdoor durability unprinted; up to 5-year outdoor durability with approved printer/inks and overlaminated or clear coated.

Media Size	30" x 50 yd	P/N 56450	378.56
	54" x 50 yd	P/N 15407	681.41
	60" x 50 yd	P/N 15348	757.12

# **Solvent Vinyl, Clear**

IJ3650-114

3M

IJ3650-114 is a piezo inkjet printable, 2 mil film with a pressuresensitive adhesive. This film is an excellent choice for permanent, medium-term cut graphics or single panel vertical graphics and signs.

Media Size 54" x 50 vd P/N 8571 779.57

#### **IJ8150**

An optically clear cast vinyl film that boasts a changeable adhesive.

Media Size 54" x 50 yd P/N 84598 1,010.54

#### **IJ61**

A 3-mil intermediate, clear vinyl film with a low-tack, changeable adhesive, designed for use on windows and glass

Media Size 54" x 50 yd P/N 85135 342.09

#### 4500G

DPF 4500G Clear is a 3-Mil (75 micron) gloss clear calendered film with permanent pressure-sensitive adhesive. Designed for indoor and outdoor promotional graphics, DPF 4500 is made of intermediate calendered face stock with a poly coated liner.

Media Size 54" x 50 yd

#### **DPF 6000 Clear**

DPF 6000 Clear is specifically formulated for eco-solvent based inkjet printers to give the ultimate in resolution and quick drying. This 2 mil film features a face stock with superior conformability and an adhesive that facilitates easy installation. With an outdoor durability of 7 years unprinted, DPF 6000 is the perfect film for fleet or vehicle wraps, decals and markings over flat, corrugated, riveted or seamed surfaces. A variety of sizes are provided to meet most applications.

# Concept 216

Concept 216 is a 3 mil white gloss flexible calendared PVC film coated with 200-5000 permanent acrylic pressure sensitive adhesivelaminated to 80# clay coated kraft liner. This vinyl film is designed to accept a variety of solvent-based and UV curable inks common to wide format digital printing systems. Permanent bond to a variety of common substrates used in graphics applications.

Media Size 54" x 50 yd P/N 85721 146.96

# **Solvent Translucent Vinyl**

#### IJ3630-20 **3**

Use this 2 mil film for flat or thermoformed backlit graphics that have uniform color in both reflected and transmitted light. This white, translucent film has a synthetic layflat liner and clear, pressure-sensitive adhesive. It is approved for making permanent interior or exterior graphics on selected piezo inkjet printers.

Media Size 54" x 50 yd P/N 8433 1,283.02

#### **IJ63-20**

This 3.2 mil matte vinyl film has changeable, pressure-sensitive adhesive. Use for promotional graphics such as signs, trade show, point-of-purchase displays, windows and taxi tops. Use with solvent or UV piezo inkjet or screen printing ink.

Media Size 54" x 50 yd P/N 63289 354.44

#### DPF 6500 ARLON

DPF 6500 is formulated for backed and internally illuminated graphics created on solvent-based inkjet printers. This premium 2 mil cast translucent vinyl yields high-resolution images with excellent color saturation and is available in the most popular roll sizes. This product carries an outdoor durability rating of up to 7 years, unprinted.

# **MPI 2981**

A 3.4 mil semi-transparent calendered white film with removable adhesive for taxi tops, short-term promotional signage, retail and entertainment graphics. Up to 3-year outdoor durability if unprinted; up to 2-year outdoor durability if printed with approved printer/inks and overlaminated or clear coated.

Media Size 54" x 50 yd P/N 15285 216.72 60" x 50 yd P/N 15387 240.77

# **Solvent Reflective Vinyl**

#### IJ680CR-10 3M

This removable 7 mil, flexible, enclosed lens, retroreflective film has slideable, pressure-activated adhesive, air release channels, excellent angularity, up to 9 years durability. A white film with a typical coefficient of retroreflection of 100, use it for commercial vehicle, rail and bus graphics, sign graphics and striping. Certain ASTM and NFPA standards apply. For piezo inkjet printing.

Media Size 48" x 50 yd 48" x 25 yd P/N 8061 2,633.54 48" x 25 yd P/N 8437 1342.44 48" x 5 yd P/N 8570 263.36

#### **IJ5100R**

A white, 7 mil, flexible, enclosed lens, engineer grade, retroreflective film with excellent angularity, up to 7 years durability, excellent cutting and weeding, and removes with heat. Use for cut letters, decals, vehicle markings, non-regulated signage. Typical coefficient of retroreflection of 100. Meets ASTM D-4956 07 for Type 1 sheeting and NFPA requirements. For piezo inkjet printing.

Media Size 48" x 50 vd P/N 18448 1,576.81

#### DPF 2400 ARLON

DPF 2400 is a 5 mil, printable, reflective vinyl designed for indoor and outdoor graphics. It is ideal for motor and railway coaches, fleet and vehicle markings, and any surface requiring increased visibility at night. This digitally-printed film, with permanent pressure sensitive adhesive, is compatible with a wide variety of direct print systems, and conforms well to both flat and irregular surfaces. DPF 2400 has a 7-year outdoor durability.

Media Size 48" x 50 yd P/N 40030 1,241.04

#### **Solvent Banner & Mesh**

# Ultrabanner® FL Gloss

Ultrabanner® FL is a 10 oz. light weight, front-lit banner and bill-board material that is best suited for short-term indoor or outdoor applications. Tear and fade-resistant, Ultrabanner FL is a great economical banner choice for UV, solvent or screen-printing.

## **SuperSmooth PET Blockout**

SuperSmooth PET Blockout is a 15 oz. smooth, scrimless, blockout banner material. This media is engineered primarily for indoor use and has a no curl formula giving it a lay-flat appearance without having to use hemming tapes. The blockout layer in SuperSmooth PET Blockout is made of matted PET, which allows for easier separation during the recycling process. It is best suited for double sided signs and banners that hang or are installed in banner stands.

Media Size	38" x 164'	P/N 88925	239.62
	54" x 164'	P/N 88926	340.19
	63" x 164'	P/N 88927	397.30
	86" x 164'	P/N 88928	546.28
	126" x 164'	P/N 88929	794.59

#### **DSS Blockout**

DSS 12 oz. Blockout is a 12 oz. smooth, two sided blockout banner material that delivers similar quality printing results on both sides. DSS is compatible for use with eco solvent, latex, screenprinting, solvent and UV inks. It is best suited for indoor applications where complete banner opacity is needed. With its unique low curl formula and lay-flat appearance, DSS 12oz Blockout is perfect for pop-up or scrolling banner stands, tradeshow and event graphics, POP and any hanging banner or sign.

Media Size	38" x 164'	P/N 88617	123.80
	54" x 164'	P/N 88623	175.76
	63" x 164'	P/N 88624	205.27
	80" x 164'	P/N 88626	260.44
	102" x 164'	P/N 88627	333.56
	126" x 164'	P/N 88628	615.80

#### **Pole Banner**

Pole Banner Pro 18oz is a heavy duty blockout banner material for indoor or outdoor applications. Its uniquely woven 1000 x 1000 scrim provides strength and stability under harsh weather conditions. Pole Banner Pro 18oz is designed for two sided applications where complete opacity is necessary. Both sides have a matte finish and are compatible with eco solvent, latex, solvent and UV inks.

Media Size	38" x 164'	P/N 88631	263.59
	54" x 164'	P/N 88632	374.20
	63" x 164'	P/N 88635	437.02
	80" x 164'	P/N 88636	554.48
	102" x 164'	P/N 88637	710.16
	126" x 164'	P/N 88638	874.05
	196" x 164'	P/N 88640	1.365.70

#### **Solvent Banner & Mesh**

# **UltraBlockout Matte, 15 oz.**

Coated and printable on both sides, UltraBlockout Banner<sup>TM</sup> Pro 15 oz. is well suited for double sided signs and banners and may be used for indoor or outdoor applications under moderate weather conditions, or when complete opacity is necessary. It is not for use with outdoor pole banners or boulevard banners. The back is slightly more textured than the front, but produces quality color match from front to back.

Media Size	54" x 164'	P/N 55600	255.14
	80" x 164'	P/N 3287	378.05
	10' 6" x 164'	P/N 3286	635.67

### **UltraBlockout Matte, 20 oz.**

UltraBlockout Banner<sup>TM</sup> Pro 20 oz. is a heavier, more durable blockout banner material than the UltraBlockout Banner<sup>TM</sup> Pro 15 oz., and can be used for a wider variety of applications including truck sides. It well suited for double sided signs and banners and may be used for indoor or outdoor applications under harsh weather conditions, or when complete opacity is necessary. Like the 15 oz. version, Ultra-Blockout Banner Pro<sup>TM</sup> 20 oz. is coated and printable on both sides for UV, solvent or screen-printing. The back is slightly more textured than the front, but produces quality color match from front to back.

Media Size 10' 6" x 164' P/N 47621 913.77

# **Strip Mesh Plus**

Strip Mesh Plus comes with a PVC backing, it is an 8 oz., PVCcoated polyester mesh, and is printable on one side with UV, solvent or screen printers. The back-side of the mesh has a protective and air-tight backer, which prevents ink spray-through when printing, and helps feed the material through the printer. This backer may be easily peeled off after printing. Strip Mesh Plus is best suited for front-lit signs and banners, and allows 37% air flow-through.

Media Size	54" x 164'	P/N 4453	221.13
	63" x 164'	P/N 4454	258.25
	72" x 164'	P/N 4455	295.37

#### **UltraMesh 100**

UltraMesh® 100 is a 10 oz., PVC-coated polyester mesh, printable on both sides with UV and solvent inks. Allowing 30% air flow-through, UltraMesh 100 is best suited for large images on building, stadium and fence wraps; murals, signs, banners and protective barriers for scaffolding, as well as theatrical and TV backdrops.

Media Size	10' 6" x 164'	P/N 4283	821.08
	16' 4" x 164'	P/N 49964	1,282.93

#### **DPF 310**

DPF 310 is a 10 oz. frontlit scrim banner, available in matte, or gloss. This material provides superior print quality for one-sided, outdoor applications. DPF 310 has an outdoor durability rating of up to 1 year (unprinted).

Media Size	38" x 50 yd	P/N 82183	45.00	Gloss
	30" x 50 yd	P/N 60742	54.76	Gloss
	48" x 50 yd	P/N 60745	87.60	Gloss

#### **Photo-Tex**

Photo-Tex is a new, patented, adhesive media fabric paper that can be easily placed anywhere and then removed and reused as desired. Photo-Tex adhesive will not leave a sticky residue against 99% of any surface. It does not rip or wrinkle. It's not paper, but a fabric with a patented coating and adhesive for inkjet printers and safe hanging and removing. It can be illuminated with a backlight, be wrapped around wall corners, ceilings and poles, and be repositioned and reused over and over again. Actually, the adhesive never weakens. You can place Photo-Tex indoors or outdoors in any weather condition.

# **Golden Gate Fabric**

Golden Gate Fabric is the "bridge" between PVC banner material and textiles. It shares certain characteristics with both and makes the transition into the world of textile media an easy one. In addition, it is a great product for indoor use – from trade show signage to building graphics. Its NFPA 701 fire rating allows for use in any public area.

Media Size 54" x 164' P/N 67248 582.70

#### **VersaFabric**

VersaFabric™ gets its name from its superior versatility – from indoor POP signage to outdoor tent sides and everything in between. This go-to textile brings excellent image reproduction and brilliant color finish to a vast array of graphics. It is also NFPA 701 fire rated and is available in sizes up to 98 inches.

Media Size 54" x 82' P/N 77388 385.39

#### **Monet Canvas**

Monet Canvas, as the name suggests, is ideal for giclée art reproductions, as well as museum displays, in-store signage and interior decorating elements. It features a strong, flexible canvas structure with a uniform matte texture that gives any graphic that elegant artistic look.

Media Size 54" x 82' P/N 65930 335.73

#### Mambo Fabric

Mambo Fabric is a dynamic product featuring a unique coating that creates deep rich colors. Whether it is in-store POP signage or outdoor banners for festivals or events, this is the go-to fabric for all of those everyday applications.

Media Size 54" x 82' P/N 77391 458.08

# **Calypso Breeze Fabric**

Calypso Breeze is a lightweight translucent satin polyester fabric. It features a specialty coating that delivers photorealistic imaging with a wide color gamut, fast dry time and excellent scratch resistance. The satin finish provides a unique look that is ideal for use in backlit and roll-up displays, window graphics and short-term outdoor signage – anywhere eye-catching visuals are required.

Media Size 54" x 100' P/N 67258 400.39

#### **VariTex Fabric**

VariTex<sup>™</sup> Deco Frame 250 CA is a 100% polyester knitted fabric. It has a moderate stretch and good wrinkle resistance, which makes it perfect for trade show display systems. Recommended for indoor use. For use with latex, UV-curable, aqueous pigment and dye sublimation water-based inks.

Media Size 41" x 98' P/N 83174 363.47

#### **SolvoPrint Banner 210**

SolvoPrint PP Banner 210 is a cost-effective solution for POP and trade show graphics. Use this 8 mil polypropylene film in Roll Up and 4 Screen display systems. PP Banner has a matte, scratch resistant inkjet coating as well as a silver backing which provides opacity. Neschen recommends using an overlaminate on this product for added protection.

Media Size 36" x 98' P/N 83032 119.71

#### **Solvent Window Perforated Media**

#### **IJ8171**

Use this 4 mil cast, vinyl film to make removable, high gloss architectural and vehicle window graphics, using selected piezo ink jet printers. The 50 % perforation pattern allows a full image to be seen from the outside while still allowing good viewing from the inside.

Media Size	36" x 10'	P/N 49030	255.22
	54" x 10'	P/N 49031	379.30
	36" x 150'	P/N 8575	1,160.11
	54" x 150'	P/N 8576	1,724.04

#### 1165

Film IJ65 is an intermediate, 6-mil vinyl film with a 50% die-perforated pattern and a removable, pressure-sensitive adhesive. This short-term film is intended for solvent and UV inkjet printing and screen printing.

Media Size 54" x 164' P/N 76318 998.95

#### **IJ66**

Film IJ66 is a 5.8 mil vinyl film with a 40% perforation pattern and a removable, pressure-sensitive adhesive. This short-term promotional film is intended for piezo inkjet printing and screen printing.

Media Size 54" x 164' P/N 60517 972.04

#### Classic Vue

Exterior-mount window graphics for buses and other vehicles, bus shelters, retail signage, event centers, POP displays and a wide variety of other applications. ClassicVue's smaller hole size makes it ideal for vehicle/fleet window graphics and window graphics requiring small detail and text. 50/50% perforation pattern.

Media Size	36" x 100'	P/N 12425	530.77
	54" x 100'	P/N 12412	692.31
	54" x 25'	P/N 60830	215.39

#### **Image Vue**

ImageVue's 65/35% perforation pattern provides more print surface area, making it ideal for small-format window graphics and other graphics requiring small detail and text, and finer image resolution. Exterior-mount window graphics for decals, POP, retail and commercial signage, corporate identity and a wide variety of other applications. 35/65% perforation pattern.

Media Size 54" x 100' P/N 12429 692.31

#### **Super Vue**

Exterior-mount window graphics for building wraps, bus shelters, POP, retail and commercial signage, convention centers, corporate identity and a wide variety of other applications. SuperVue's larger hole size makes it ideal for large-scale outdoor advertising, such as building wraps. 50/50% perforation pattern.

Media Size	54" x 100'	P/N 12419	676.93
	54" x 25'	P/N 69657	215.39

#### **Econo Vue**

An economy-grade, 6 mil black/white composite PVC with approximately 1.7-mm perforations and a clear removable acrylic pressure-sensitive adhesive. Available with a solid release liner, consisting of perforated paper laminated to clear PET film; or an unperforated solid paper release liner. 40/60% perforation pattern.

Media Size 54" x 100' P/N 54570 360.01

#### **Poster Vue**

12 mil black/white composite, non-adhesive PVC with 1.5-mm perforations and a solid release liner consisting of perforated paper laminated to clear PET film. 35/65% perforation pattern.

Media Size 54" x 100' P/N 66668 638.47

# Solvent Floor/Sidewalk/Wall Media

#### **IJ162-10**

Use this positionable, removable 4 mil film for short-term, durable floor graphics on sealed surfaces. The film has pressure-activated adhesive and a matte gloss. It is approved for use with specified piezo printers.

Media Size	36" x 150'	P/N 18446	387.91
	48" x 150'	P/N 8654	517.21
	54" v 150'	P/N 8655	581 85

#### IJ3662-10

This is a 2 mil, durable, opaque film designed for making short-term graphics that are applied to unsealed, outdoor, pedestrian traffic surfaces or selected smooth-to-rough wall surfaces. This film has excellent hiding power and can be screen-printed.

Media Size 48" x 150' P/N 31996 872.41

#### **IJ8624**

A 2 mil removable graphic film designed for either solvent-based piezo inkjet printing or electrostatic printing. When heated and applied with 3M's application tools and techniques, these films conform to moderately textured surfaces on both flat and curved substrates, including concrete block, brick, industrial stucco and tile—similar to those surfaces commonly found in sports arena, stadiums, restaurants, retail and other public venues.

Media Size 54" x 150' P/N 50327 743.65

#### IJ40C-10R

3-mil matte vinyl film with a removable, pressure-sensitive adhesive and Comply adhesive for easier, bubble-free application with up to 7 year expected durability. For use where a good, versatile film is needed for general signage and indoor floor and carpet graphics. It is designed for piezo inkjet or screen printing with solvent or UV inks

Media Size 54" x 50 yd P/N 55866 435.64

## Solvent Floor/Sidewalk/Wall Media

#### **FDC 7335**

FDC Series 7335 is a premium polyester fabric with a removable adhesive designed for printing wall graphics. This product features a unique facestock that allows for full bleed printing without edge curl and lifting.

Media Size 54" x 50 yd P/N 91267 475.36

#### **DPF6700**

DPF 6700 is a 2-mil cast highly conformable film with agressive permanent adhesive. The film is specially formulated to conform to "hard to stick" highly textured masonry surfaces such as brick, stucco and concrete.

Media Size 54" x 50 yd P/N 91250 577.02

#### **DPF8000**

Made of 3.8 mil, satin white engineered vinyl, DPF 8000 is best for digital prints produced with solvent based inkjet printers that will be installed in cold temperatures or on hard-to-stick to surfaces. Its adhesive is an aggressive, high tack, permanent adhesive..

Media Size 54" x 50 yd P/N 61861 347.56

# **MPI 6121 Street Graphics**

Engineered for outdoor street graphics and other outdoor rough surface applications where an authentic, paint-like finish is desired. Its unique "micro-fracture" technology enables the film to contour to rough surfaces by fracturing and conforming.

Media Size 54" x 50 yd P/N 75599 1,667.25

# **Concept 210 Base Film**

Concept 210 is a specially formulated flexible vinyl with a high performance acrylic pressure sensitive adhesive on a 90# stay-flatliner. The combination of vinyl and adhesive allows removability of the film from most common commercial tile floor substrates for up to 6 months under normal exposure conditions.

Media Size 54" x 50 yd P/N 84033 213.20

#### **Concept 211 Laminate**

Concept 211 is a 6.0 mil clear flexible polished calendered vinyl film with a slight texture designed for use as the protective overlay for Traffic Graffic decals. Adhesive 200-4981 is a permanent acrylic pressure sensitive adhesive formulated for exceptional clarity.

Media Size 54" x 50 yd P/N 84034 314.13

#### **Cast Overlaminates**

#### **8518 Gloss**

2 mil laminate that can enhance gloss and provide additional ultraviolet and durable physical protection for selected digitally-imaged graphic constructions. It is designed for cold roll lamination only.

Media Size	36" x 50 yd	P/N 63549	400.85
	48" x 50 yd	P/N 49117	540.04
	54" x 50 yd	P/N 8431	601.28
	60" x 50 yd	P/N 49132	668.08

#### 8519 Luster

This 2 mil luster overlaminate is approved for use with selected piezo inkjet printers to provide graphics additional ultraviolet and physical protection. It is designed for cold roll lamination only.

Media Size	36" x 50 yd	P/N 8338	412.70
	48" x 50 yd	P/N 8632	555.99
	54" x 50 yd	P/N 8384	619.04
	60" x 50 vd	P/N 8386	687 32

#### **8520 Matte**

This 2 mil matte overlaminate is approved for use with selected piezo inkjet printers to provide additional ultraviolet and physical protection to graphics. It is designed for cold roll lamination only.

Media Size	36" x 50 yd	P/N 49723	414.77
	48" x 50 yd	P/N 28612	556.08
	54" x 50 yd	P/N 8385	619.14
	60" x 50 vd	P/N 8387	687.93

## 8915 Ultra Matte

This durable, UV-resistant overlaminate features pressure-sensitive adhesive. It provides warranted Scotchprint® Graphics an extra layer of protection from damaging UV rays, and the ultra-matte finish minimizes the glare from interior lights.

Media Size 54" x 50 yd P/N 21251 619.01

#### **8580 Gloss**

This is a conformable overlaminate that provides durable physical and ultraviolet light protection when used as recommended in the base film Product Bulletin. Apply by cold roll lamination. Use with 13380 CV3-10.

Media Size 54" x 50 yd P/N 60513 654.87

#### 3220G **ARLON**

Series 3220 is a 2 mil cast vinyl overlaminate that comes with a gloss finish. With its superior conformability and 7 year outdoor durability, Series 3220 is great for protecting your interior and exterior digitally printed graphics.

Media Size	30" x 50 yd	P/N 41260	234.11
	36" x 50 yd	P/N 11659	280.92
	48" x 50 yd	P/N 11660	374.56
	54" x 50 yd	P/N 11661	421.39
	60" x 50 vd	P/N 11662	468.20

#### **Cast Overlaminates**

#### 3230M

Series 3230 is a 2 mil cast vinyl overlaminate that comes with a matte finish. With its superior conformability and 7 year outdoor durability, Series 3230 is great for protecting your interior and exterior digitally printed graphics.

Media Size	30" x 50 yd	P/N 47358	229.51
	36" x 50 yd	P/N 11663	280.92
	54" x 50 yd	P/N 11665	421.39
	60" x 50 vd	P/N 11666	468.20

#### **DOL 1060 Gloss**

Premium glossy cast overlaminates with outstanding conformability. DOL 1060 Gloss delivers a high-gloss, paint-like finish suited for vehicle graphics.

Media Size	36" x 50 yd	P/N 15433	368.88
	54" x 50 yd	P/N 15432	553.30

#### DOL 1080 Matte

Premium matte cast overlaminates with outstanding conformability. DOL 1080 Matte delivers a high-gloss, paint-like finish suited for vehicle graphics.

Media Size 54" x 50 yd P/N 15435 553.30

#### **DOL 1360 Gloss**

Avery's most conformable overlaminate makes vehicle wraps even easier. Ultra-thin 1.3 mil film assures graphics will conform easily, with a choice of finishes ideal for vehicle and fleet applications. Eliminates 'silvering' effect on UV-printed images.

Media Size	30" x 50 yd	P/N 56479	267.76
	48" x 50 yd	P/N 56480	428.24
	54" x 50 yd	P/N 56481	481.76
	60" x 50 yd	P/N 56482	535.29

#### **Calendered Overlaminates**

#### 8508 Luster

Overlaminate 8508 is a 2.3-mil clear vinyl film that provides a higher gloss than the luster overlaminate 8509, as well as ultraviolet and physical protection. Apply by cold roll lamination to digitally-imaged graphics made with 3M intermediate graphic films

Media Size	54" x 50 yd	P/N 85908	302.41
	61" x 50 vd	P/N 85909	341.61

#### **8509 Luster**

This 4 mil luster overlaminate is approved for use with selected piezo inkjet printers to provide graphics additional ultraviolet and physical protection. It is designed for cold roll lamination only.

Media Size	54" x 50 yd	P/N 56238	302.41
	61" x 50 vd	P/N 56243	341.61

#### **3420 Gloss**

3420 is a 3 mil calendered gloss overlaminate that provides moderate protection for printed graphics. It performs well over flat and soft contours and offers outdoor durability up to 5 years. It's perfect for point-of-purchase displays, vending machines and architectural graphics.

Media Size	30" x 50 yd	P/N 57419	96.26
	36" x 50 yd	P/N 63852	115.51
	54" x 50 yd	P/N 57365	173.26
	60" x 50 vd	P/N 57418	192.51

### **3420 Satin**

3420 is a 3 mil calendared satin overlaminate that provides moderate protection for printed graphics. It performs well over flat and soft contours and offers outdoor durability up to 5 years. It's perfect for point-of-purchase displays, vending machines and architectural graphics.

Media Size	30" x 50 yd	P/N 41261	96.26
	36" x 50 yd	P/N 11667	115.51
	54" x 50 yd	P/N 11669	173.26
	60" x 50 yd	P/N 11670	192.51

# **DOL 2060 Gloss**

Premium calendered overlaminate, 3.1 mil thick, and ideal for flat to simple curve applications. DOL 2060 has a gloss finish suited for trade shows, retail graphics, bus shelters and other advertising. Outstanding resistance to abrasion and scratches, with superior UV protection and water resistance.

Media Size	30" x 150 yd	P/N 56465	130.23
	38" x 150 yd	P/N 56466	164.96
	48" x 150 yd	P/N 56467	221.38

# **DIGITAL EQUIPMENT**

# **Roll to Roll Inkjet Printers**

# JV33-160s **Solvent Inkjet Printer**

Mimaki's affordable, high performance JV33-160s is a perfect fit for the shop looking for a proven winner to produce digital graphics. A new high-speed print head containing 180 nozzles x 8 lines, allows for

ease of assembly and calibration. With its increased print head accuracy, the JV33 delivers truly high quality prints up to 1440 dpi. The JV-33 is also available in 53.5" and 103.6" print widths.

Media Width: 63"

**Print Resolution:** Up to 720 x 1440 dpi Inkset: Solvent (SS21), Eco-solvent (ES3) Aqueous, Pigment or Dye Sublimation

# CJV30-160s Solvent Inkiet Printer

The CJV30-160 offers the ability to print and cut your vinyl graphic with the same machine. The new 8-channel printhead offers ease of maintainence with quality prints. UISS ink delivery system is standard. The CJV30 is also offered in print widths of 24", 40.1", and 53.5".

Media Width: 63"

**Print Resolution:** Up to 720 x 1440 dpi Inkset: Solvent (SS21), Eco-solvent (ES3)

#### **JV34-260 Solvent Inkiet Printer**

The 102.3-in.-wide, JV34-260 printer produces signs, banners, flags or other print media at speeds up to 30 sq. m./hr. The 1,440-dpi printer includes Mimaki's

RasterLink Pro5 RIP software, newly-designed, staggered (piezo, DOD) printheads that produce three variable dot sizes; an uninterrupted ink-supply system, a web-tensioning, automatic feeder and a three-way, intelligent heater system that allow unattended production

Media Width: 102"

Print Resolution: Up to 720 x 1440 dpi

**Inkset:** Solvent (SS21), Dye Sublimation (SB52)

#### JV-400LX Latex Printer

The JV400-130/160LX supports six colors plus white, and the world's first latex printer using white ink. The JV400-130/160LX is equipped with Mimaki's MCT (Mimaki

Circulation Technology) ink circulation system that prevents pigment sedimentation for stable ink dispersion and a reduced need for manual ink cartridge circulation processes. A low curing temperature of 60 degrees C or below also enables printing on a wide range of heat-sensitive materials. Exceptional quality is ensured by a minimum dot size of 4 picoliters and the ability to use variable sized ink dots for smooth gradation without a grainy appearance.

Media Width: 63"

Print Resolution: Up to 900 x 1200 dpi Inkset: Latex. C, M, Y, K, Lc, Lm, + white

#### W-64s SII 🍑 Seiko I Infotech Inc. **Solvent Inkjet Printer**

The new ColorPainter W series mild solvent inkjet printers from Seiko are available in two sizes, the W-64s 64" and the W-54s 54" widths. There are also two color configurations for both sizes, the 4 color type for lower operating costs and the 6 color type for better image quality.

New additional features include CP Manager software for remote printer diagnostics, Smart Pass 3 for reduced banding and Smart Nozzle Mapping for increased printhead life. The newly developed IX ink series offers an HAP-free formulation for those looking for a "green" solution".

Media Width: 64"

Print Resolution: Up to 900 x 900 dpi

Inkset: Low Odor EG-Outdoor EX solvent & IX HAP-free

## **H2-74s Solvent Inkiet Printer**

The H2-74s achieves class-fastest printing speed of 538 sq.ft./hr in the 8-color mode and 1075 sq.ft./hr with the dual 4 color configuration. Smart Pass print technology greatly reduces banding. Second generation

Seiko printheads allow for quality "draft mode" prints with "double drop" inkjetting. 1.5 liter ink bags replace bulky cartridges.

Media Width: 75"

Print Resolution: Up to 720 x 720 dpi Inkset: Low Odor EG-Outdoor EX solvent

### **H2-104s Solvent Inkjet Printer**

The H2-104s achieves class-fastest printing speed of 538 sq.ft./hr.

in the 8-color mode and 1075 sq.ft./hr. with the dual 4 color configuration. Smart Pass print technology greatly reduces banding. Second generation Seiko printheads allow for quality "draft mode" prints with "double

drop" ink jetting. 1.5 liter ink bags replace bulky cartridges.

Media Width: 104"

**Print Resolution:** Up to 720 x 720 dpi Inkset: Low Odor EG-Outdoor EX solvent.

# **DIGITAL EQUIPMENT**

## **Hybrid UV Inkjet Printers**

up to .4" thick as well as roll-to-roll products.

# **UJV-160 Hybrid Printer Mimaki**

With the abilty to print to heat-sensitive substrates, the UJV-160 offers the flexibility of a hybrid UV printer with the addition of state-of-the-art LED UV curing technology. The UJV-160 can print rigid media

Media Width: 63"

**Print Resolution:** Up to 1200 dpi **Inkset:** UV. C, M, Y, K + white

#### **Flat-Bed UV Inkjet Printers**

# JF-1631 Flatbed Printer Mimciki

The Mimaki JF-1631 flatbed UV inkjet printer utilizes a 5' x 10' vacuum table to print on a variety of rigid substrates. The JF-1631 can print on transparent media, as well as dark substrates with the included white ink. A newlydeveloped clear ink allows for the application of a high gloss protective layer for increased longevity. The JF-1610 is also available with a 63" x 40" print area.

**Print Area:** 63" x 122", up to 2" thickness **Print Resolution:** Up to 1200 x 1200 dpi

Inkset: UV. C, M, Y, K, Lc, Lm + white. Clear available.

# **UJF-3042 Flatbed UV Inkjet Printer**

The most affordable UV LED curing printer in the market is the Mimaki UJF-3042. This compact tabletop printer will print everything up to 2" in thickness. The UV LED curing system does not generate excessive heat which allows the

ultaneous white over and underprinting with the two staggered printhead arrangement allows for print speeds the same as color printing

printing.

**Print Area:** 12" x 16", up to 2" thickness **Print Resolution:** Up to 1200 x 1440 dpi

printing of heat-sensitive material. The sim-

Inkset: UV. C, M, Y, K, Lc, Lm + white. Clear available.

# OCE Arizona 318GL Flatbed Inkjet Printer

Océ Arizona® 318 GL UV flatbed printer, designed as a capable, introductory-level printer that allows smaller shops to produce high-quality, UV-cure, flatbed printing. With

Océ VariaDot® imaging technology, the 318GL offers the same platform and application versatility as Océ's popular Arizona 360 GT printer. The 318 GL UV accepts 49.2 x 98.4-in. rigid media up to 1.89 inches thick. In Express Mode, it images up to 194 sq. ft./hr.

Maximum Print Area: 49.6'x98.8" Print Resolution: Up to 1440 dpi Inkset: UV, C, M, Y, K + white

# OCE Arizona 360GT Flatbed Inkjet Printer

The Océ Arizona 360 GT printer is the next generation model of the award-winning Océ Arizona printer line.

A White Ink Option is available for under-printing on non-white media or objects, over-printing for backlitapplications on transparent media and/or printing white as a spot color.

Production print speeds give users the ability to print nearly 60 full-sized boards—or 1615 ft.2 (150 m2) of flexible media—in a single 8-hour shift. The Océ Arizona 360 GT printer uses UV curable inks and Océ VariaDot™ imaging technology to deliver near-photographic image quality on a wide range of rigid or flexible media. Take on work that was never before possible with lesser quality printing systems. The Océ Arizona 360 GT printer gives you endless opportunities to increase your display graphics revenue.

Maximum Print Area: 49.6"x98.8" Print Resolution: Up to 1440 dpi Inkset: UV, C, M, Y, K + white

# OCE Arizona 550GT Flatbed Inkjet Printer

The Océ Arizona 550 GT printer features a Production print mode of up to 433 square feet per hour on rigid media without sacrificing any of the award-winning print quality for which the Océ Arizona Series is famous. This enables users to print more than 100 four-by eight-foot boards in a single eight-hour shift. With this productivity, print providers can confidently take on peak demand and rush jobs. An Express print mode will also be available with print speeds of up to 721 square feet per hour, or 22 four- by eight-foot boards per hour, nearly three times higher than the fastest print speed available on the Océ Arizona 350 GT printer.

Maximum Print Area: 49.6'x98.8" Print Resolution: Up to 1440 dpi Inkset: UV, C, M, Y, K + white

# OCE Arizona 360XL / 550XL Flatbed Inkjet Printer

These models are similar to the 360GT and 550GT above but they offer a printing bed that is twice the size. The printing bed on these models are 98"x120" instead of 49"x 98" and offer an increased printing speed.

# enVision Series Plotter

The enVision series sprocket-feed plotters are designed for the rigors of everyday use. These workhorse machines offer the ultimate in speed, reliability and durability. The enVision plotters offer ultraprecise tracking and automatic material alignment and are the fastest sprocket-feed plotters on the market.

Media Width 15" enVision, P/N 10837 30" enVision 750 P/N 10836

#### **GS Plus Series Plotter**

The GS Plus series is the Gerber family of highly accurate stepper motor sprocket plotters that use perforated materials. These open-architecture workhorses feature KMS – Knife Mode Switching technology, for optimal cutting of all materials. GS plotters are simple to learn and operate, and define the term "unattended-operation". Includes accessory kit, knife tool holder and blade, pen, and material roll holder.

Media Width 15" GSX 15 Plus P/N 12037 30" GS 750 P/N 61164

### **Thermal Printer**

# **Edge FX Thermal Resin Printer**

The Gerber Edge is an advanced digital printing solution that is designed for sign makers, screen printers, and other graphic professionals seeking to quickly produce indoor and outdoor short run graphics. The Edge FX is a thermal transfer device that uses heat and pressure to transfer resin-based pigments to over 30 different substrates.

P/N 13270

# **DIGITAL EQUIPMENT**

#### **Cutters & Routers**

#### M Series Flatbed Cutter

The Gerber M Series flatbed cutter is a powerful and versatile solution for automatic print-to-cut finishing of a wide spectrum of graphic outputs. From routing inkjet-printed corrugated plastic, to kiss-cutting vinyl decals, to contour cutting and creasing of digital offset POP graphics, the Gerber M Series can handle all your finishing needs accurately and 100% digitally, expanding your capabilities while maximizing the productivity and efficiency of your operations.

Table Size 103" x 148" M3000 P/N 56170 95" x 77" M1200 P/N 56700

#### Sabre 408 Router

Gerber Sabre routers are ideally suited for dimensional sign making, woodworking, and parts fabrication applications. Sabre routing systems offer high-speed letter and graphic design routing along with dependability, flexibility, ease of use, and minimal maintenance. Increase capacity while reducing customer lead times with the Gerber Sabre. Combine the Sabre with Gerber's top of the line router bits for a complete automated routing solution.

Table Size 54" x 121" 408 P/N 42038

#### **Laminators**

### 62 Pro D Laminator

The SEAL 62 Pro D is the next generation professional laminators. With fully adjustable temperature, speed and pressure settings, this laminator is ideal for the more experienced user who requires a highly versatile laminator. This 61" wide laminator has dual heated rollers for hot or cold lamination.

P/N 65274

# **54 Base EL** Laminator

The SEAL 54 Base laminator represents SEAL's latest offering to the rapidly moving sign and display market. Ideal for mounting and laminating pressure-sensitive solutions up to 52", this machine represents a flexible package at an affordable price, yet without compromising its functionality. Cold lamination only.

RollsROLLER

The ROLLSROLLER® is used for all types of self-adhesive foil applications, including banners, signs, road signs and markers, glass application, coloring of large areas and application on

substrates up to six centimetres thick. Its uses are almost infinite. The ROLLSROLLER® minimizes waste and produces perfectly flat application without bubbles and creases. Manual application on really big signs involves a lot of climbing and knee-bending. The ROLL-SROLLER® gives you an ergonomic working position that spares your back and knees. Available in several models and sizes.

P/N 91384

## **Air Filtration Systems**

# Duster 2000 FC

The Duster 2000 removes dust, odors, smoke, voc's, mists, spray powder, toxic fumes, pollen and bacteria, and a lot more. This unit is perfect for industrial or print shops where fumes and particles are present in the air.

P/N 12500

### CaptiveAir Fume Control System

Traditionally, air purification and treatment has dealt with removing particulate and contaminates from the air after they are released. This reactionary process of treating the air exposes your employees and the environment to fumes from solvents. CaptiveAir cleaning products offer a proactive process of removing fumes from drying solvent based inks at the source, on the printer.

P/N 12500

# Digi-Dry InfraRed Dryer

The Digi-Dry is a portable infra-red heat system that is designed to roll up to your solvent inkjet printer and assist with drying the ink to a full cure.

Works with all printer models.

P/N 44660.

P/N 43853

# **DIGITAL EQUIPMENT**

#### **Software**

# FlexiSign PRO Software

The SAi flagship product, offers the total solution for any Sign Making business. With genuine Adobe® PostScript® 3 RIP engine, ICC profile support and built-in direct drivers, FlexiSIGN-PRO offers a complete set of design, cutting, RIPing and printing tools for maximum productivity.

P/N 66259 Call for pricing.

#### FlexiEXPERT Software

The package for the professional signmaker who requires advanced vinyl cutting and bitmap editing tools, without color-printing output. FlexiEXPERT includes full design, text serialization and color tracing features, as well as job estimating for accurate project management and design templates for faster production.

P/N 66260 Call for pricing.

#### FlexiPRINT & CUT Software

A brand-new design, scanning and tracing software package with complete cutting output. FlexiPRINT & CUT has the versatility to RIP and print to two devices simultaneously. Text Styles and Job Statistics are also included for impeccable results.

P/N 66271 Call for pricing.

#### **FlexiSIGN Software**

The mid-level Sign Making package provides exceptional tools to produce high-quality signage without a large initial investment. In addition to design, vinyl cutting, scanning and tracing capabilities, FlexiSIGN also includes Job Statistics and Text Styles for enhanced performance.

P/N 55229 Call for pricing.

#### **FlexiLETTER Software**

The entry-level layout and cutting package, features file import/export, full text manipulation and direct drivers for the industry's most popular vinyl cutters.

P/N 66266 Call for pricing.

#### **FlexiDESIGNER Software**

A program you can use as a second, design-only station. Get all the design, layout and image editing features of FlexiSIGN-PRO, as well as file preparation for output on another Flexi Family station, without the full price investment. Offers the total solution for any sign making business.

P/N 66268 Call for pricing.

#### **PhotoPRINT SERVER-PRO Software**

The complete client-server RIP solution package includes extended capabilities and cost-saving features. Additional features include an EDITOR station for layout and design and Color Profiler for output profile creation and editing.

P/N 55221 Call for pricing.

#### **PhotoPRINT SERVER-PRO Software**

The client-server RIP solution for networks and large production environments, featuring productivity tools such as Job Priority, Page Nesting and Job Nesting. These tools will make workflow to multiple printers generate accurate and consistent results in any volume.

P/N 55222 Call for pricing.

#### **PhotoPRINT DX Software**

An unparalleled layout package with design capabilities for text, shapes and effects, combined with the versatility to RIP and print to two devicessimultaneously. The design and output of Print & Cut decals is straightforward and accurate with this integrated solution.

P/N 55223 Call for pricing.

#### **PhotoPRINT SE Software**

A RIP solution with the fundamentals for the single-workstation environment. Send jobs to RIP and print directly from popular design applications such as Adobe Photoshop® and Illustrator®, QuarkXPress®, CorelDRAW®, and CAD/AEC/GIS engineering solutions.

# **ProductionHouse Software**

ProductionHouse is ideal in locations where there are three or more printers, from the same or different manufacturers. ProductionHouse users are looking for a single, full-featured workflow solution that will keep their printers running at top speed while automating the majority of production processes. Experience, reliability, scalability, and universality are key. ProductionHouse comes with two PostScript RIPs and support for four active printers, so you can print to four printers simultaneously and RIP two jobs at the same time. You'll get all the features of RipCenter and PosterShop, plus Step & Repeater for seamless pattern tiling and the new Contour Cut feature.
