

## Hiker Self Piercing #2 Grommets & Hand Press

Hiker #2 self piercing grommets are exactly 3/8" diameter opening and are available 500 per box. HIKER brand grommets are not interchangeable with other grommet manufacturers. You must use a Hiker brand die set to set Hiker brand grommets. All of Hiker's self-piercing grommets are solid, heavy gauge brass - at least 22% thicker than next closest competitor. Nickel means the brass is plated with nickel. Black is brass that is plated with copper then oxidized black. White is brass that is painted white.

### H-901F/B

#### GROMMETING HAND PRESS

Forward or Backward Handle

- Weight: 16 lbs.

The HIKER H-901 hand press offers all the versatility you'll ever need from a hand press. The die are interchangeable, so you can insert several types and sizes of grommets with the same press; the lower die is adjustable, which provides a consistent, quality setting in various material thicknesses - no more guessing when to stop pushing the handle down!; and the HIKER H-901 was designed to produce up to 6 times more cutting and closing pressure than other competing presses. That means that the H-901 requires up to 6 times less human effort to insert a grommet! Flat washers; turn-over washers; spur washers; thin material; thick material; whatever your needs are, the HIKER H-901 hand press is the best hand press available.

*Work smarter, not harder. Using a hammer to insert grommets is like using a rock to pound nails... it's really not necessary, or efficient. It also costs more! HIKER has developed a great hand press that will save you money while improving the quality of your products. The H-901B will quickly pay for itself on labor savings alone!*
